PREFACE.

WE have much pleasure in calling attention to the many IMPROVEMENTS described in this new edition of our CATALOGUE OF STABLE FITTINGS. The prices have also been carefully revised throughout, and are as low as is compatible with the best workmanship and materials.

Our object, as heretofore, is to maintain the *HIGHEST STANDARD OF EXCELLENCE* in the work we turn out, and that our articles find general favor, we are glad to be assured by their constantly increasing sales, and by the unsolicited testimonials we frequently receive.

The whole of our manufactures are carried out under our PERSONAL SUPERVISION.

The EXPERIENCE gained in *years of special attention* to the furnishing of Fittings, enables us to present to our patrons the newest designs and the latest ideas for the increased comfort and safety of the Horse, and the careful preservation of Harness on Brackets constructed to keep the various articles for which they are intended in shape, and to insure the perfect airing and drying of the same.

A noticeable feature in our illustrations is the effort to show the comparative size of each article, as well as giving necessary dimensions.

We would very respectfully urge intending purchasers, in order to satisfy themselves of the excellence in *DESIGN* and *WORKMANSHIP* of our manufactures, to personally inspect our show-rooms, 84 to 90 BEEKMAN ST. N. Y., 311 & 313 WABASH AVE. CHICAGO, where full size Stalls, Box Stalls, etc., are fitted up with every requisite in the simplest and most carefully considered styles.

Provision for Ventilation and Drainage has received special attention.

In ordering STABLE FITTINGS, our customers should be careful not only to give the correct Plate Numbers as given in the book, but to be very exact as to dimensions where goods have to be made to order, accompanying same with detailed drawings or plans, if possible; the latter is particularly necessary when ordering Guards for Box Stalls, also in laying out Stable Gutter.

Our new line of *CATTLE HOUSE* and *PIGGERY FITTINGS* will no doubt be interesting.

Special attention is given to these Fittings as may be readily seen; and the *variety* of our designs enables customers to judge of their requirements, while an opportunity to examine them by sample in our Show Rooms is offered.

THESE PLANS ARE MERELY SUGGESTIONS FOR ARRANGING THE INTERNAL FITTINGS OF STABLES.

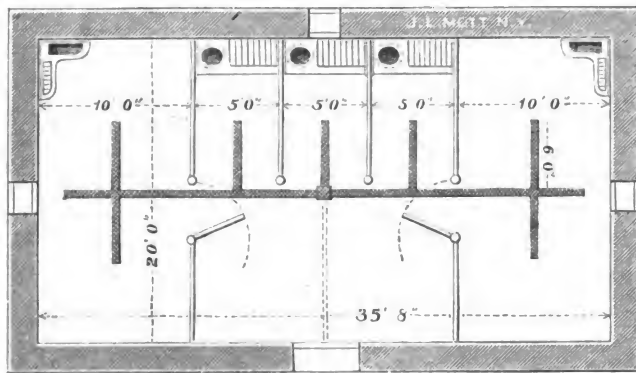

PLATE 1-P.

Plan showing three Open and two Box Stalls.

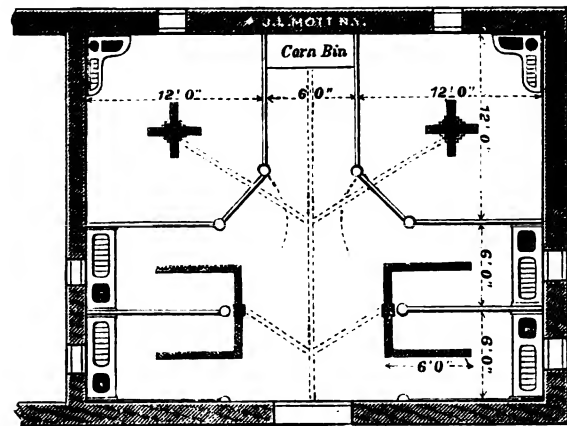

PLATE 2-P.

Plan showing four Open and two Box Stalls.

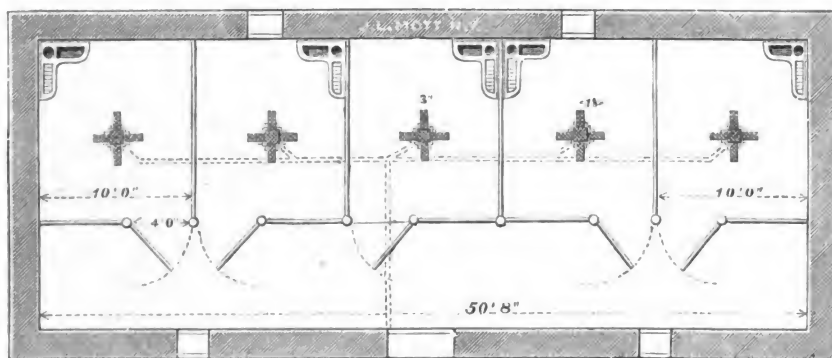

PLATE 3-P.

Plan showing five Box Stalls.

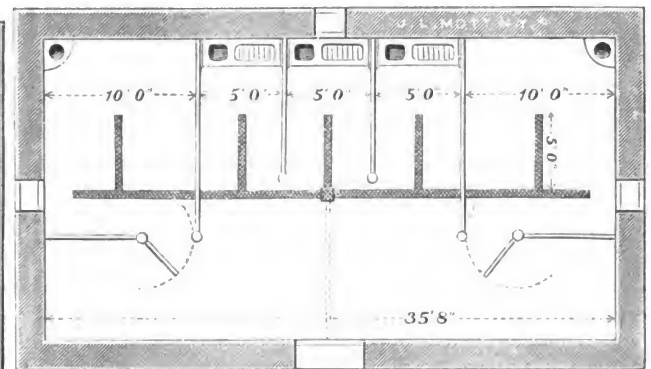

PLATE 4-P.

Plan showing three Open and two Box Stalls.

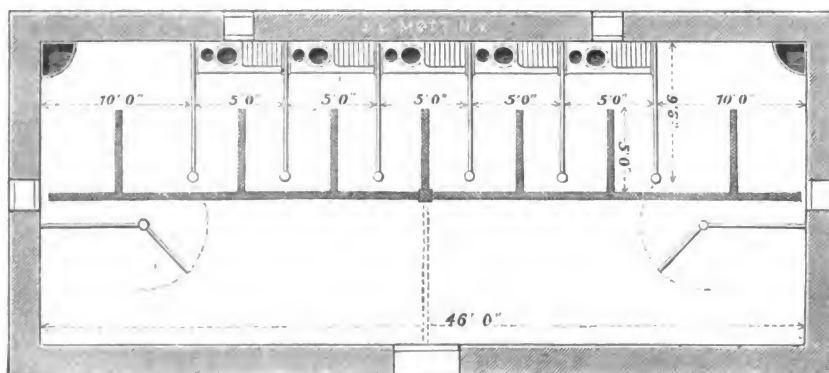

PLATE 5-P.

Plan showing five Open and two Box Stalls.

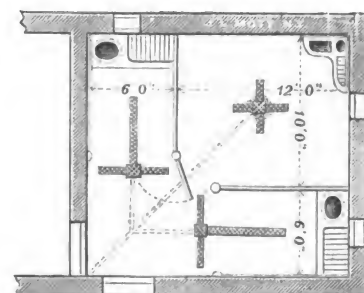

PLATE 6-P.

Plan showing two Open and one Box Stall.

THESE PLANS ARE MERELY SUGGESTIONS FOR ARRANGING THE INTERNAL FITTINGS OF STABLES.

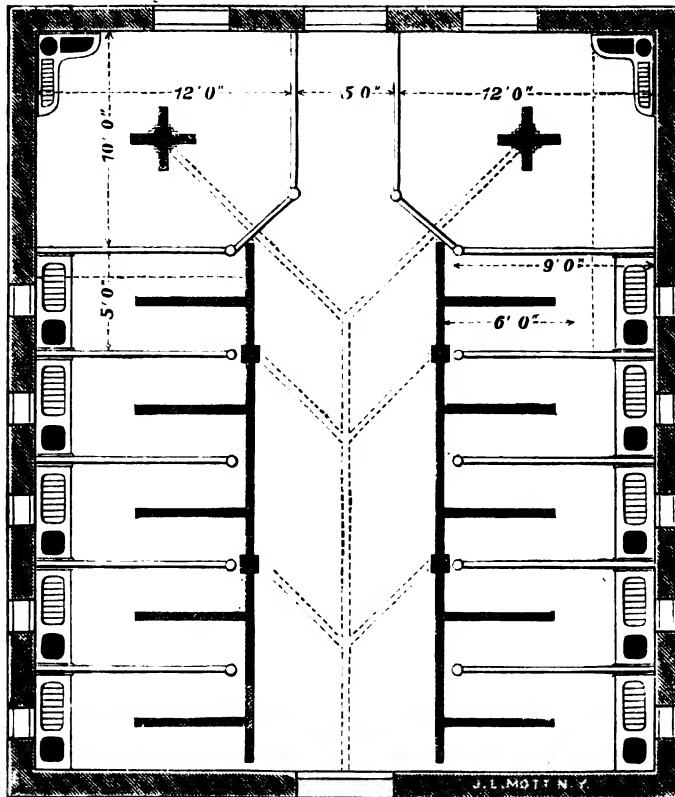

PLATE 7-P.

Plan showing ten Open and two Box Stalls.

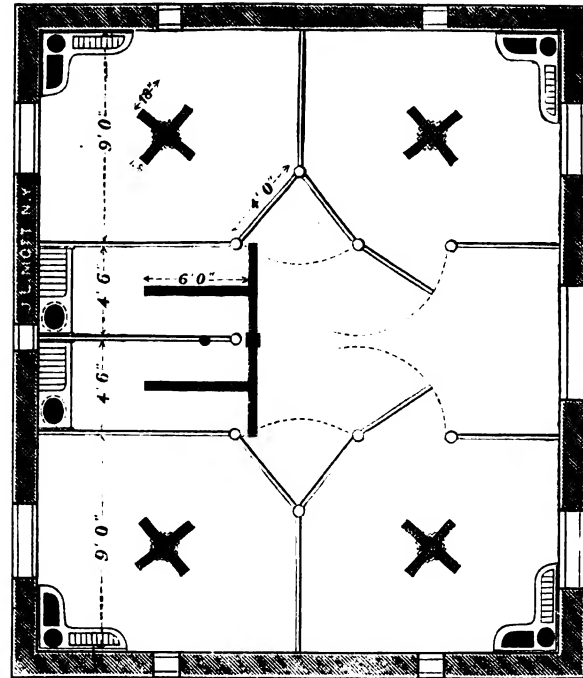

PLATE 8-P.

Plan showing two Open and four Box Stalls.

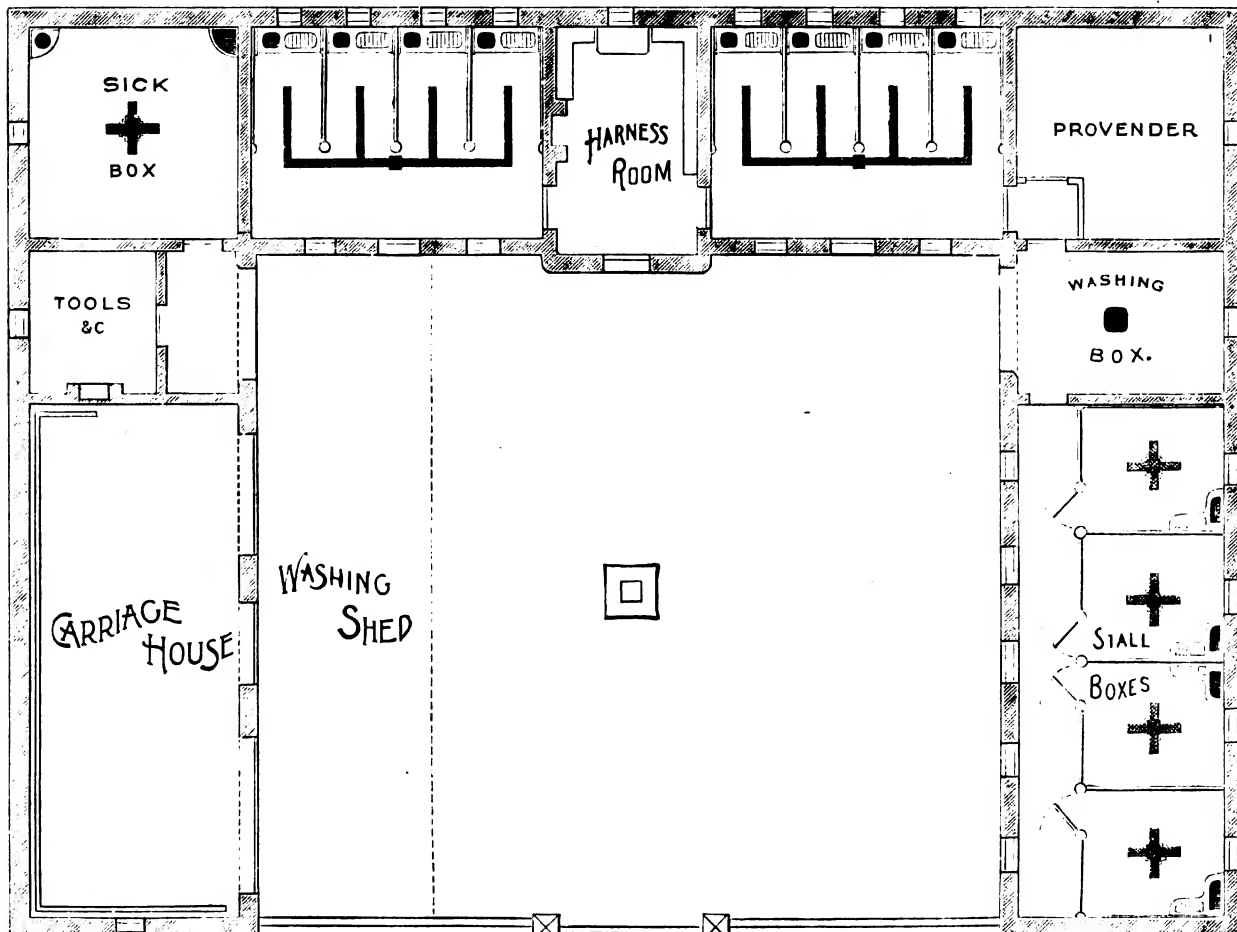

PLATE 9-P.

Plan showing a complete Stable Yard, with accommodation for twelve Horses, &c. Two Stables with four Stalls in each, and one Stable containing four Box Stalls, also Sick Box, Washing Box, Harness Room, Coach Room, Fodder Room, &c.

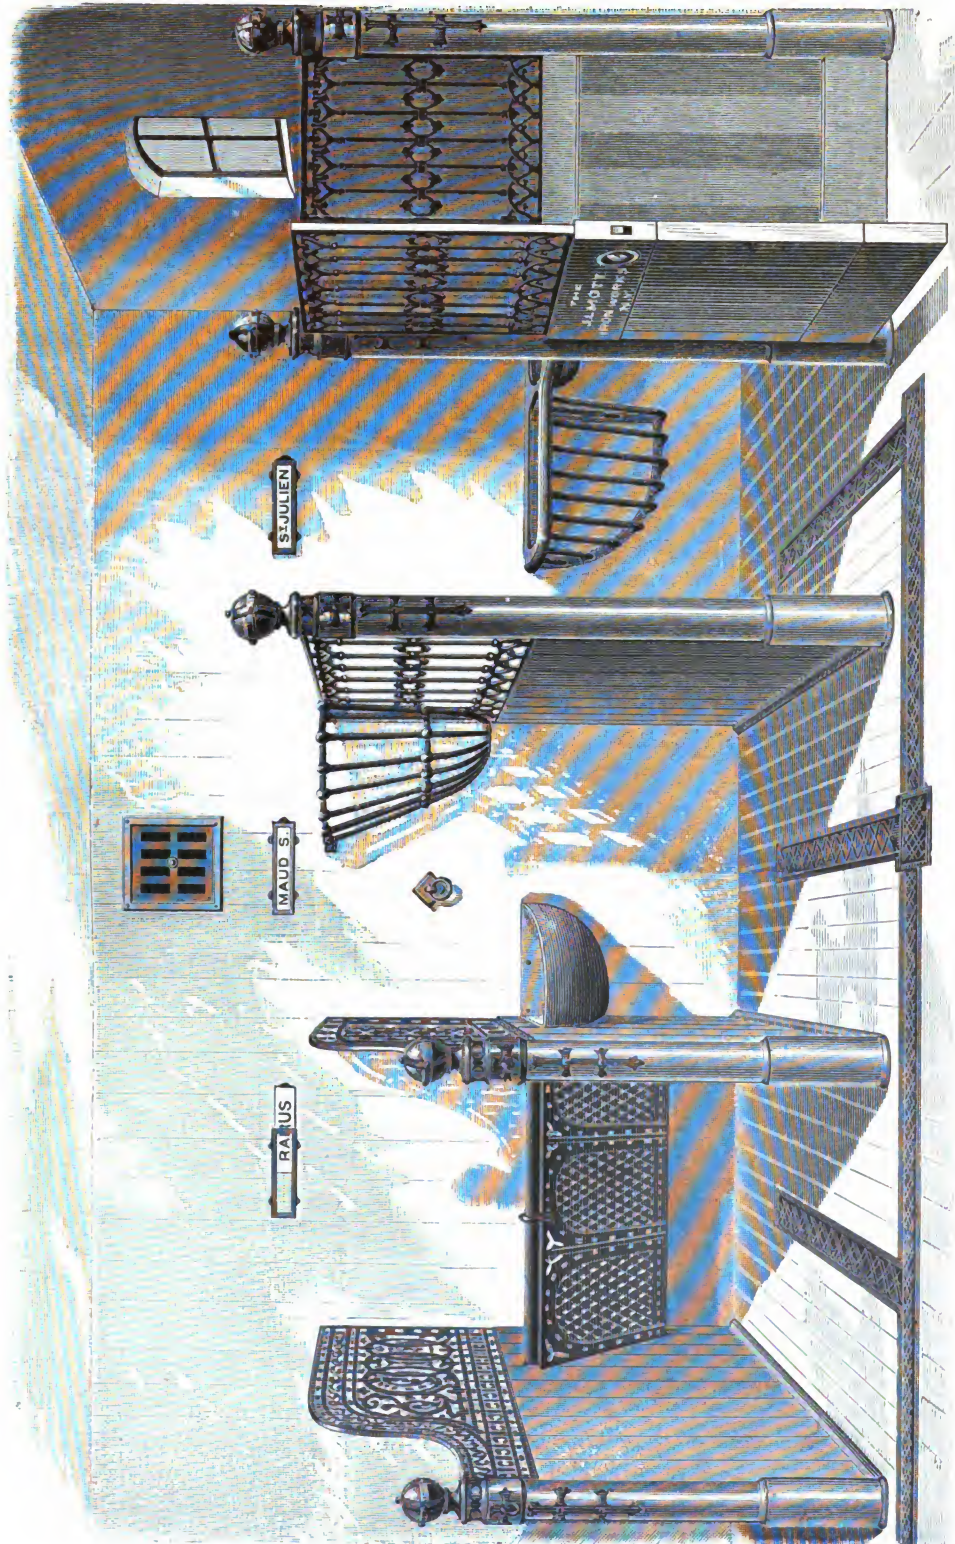

PLATE 10-P.

STABLE INTERIOR.

The above design shows two Open Stalls and one Box Stall with various Fittings, as illustrated in following pages.

PLATE 11-P.

STABLE INTERIOR.

Designed to show four Open Stalls and two or more Box Stalls, Fittings for which may be selected from following pages.

A passage-way in front of Stalls, indicated by entrances at either end of Stable, affords an easy method of feeding through doors at head of Stalls, as shown.

PLATE 12-P.

STABLE INTERIOR.

Showing two Open Stalls and one Box Stall, fitted up in a very simple and complete style, with Cast Iron Stall Posts, Wrought Iron Guards and Cast Iron Mangers. (See following pages.) The Automatic Feeder shown is fully described, with prices on opposite page.

AUTOMATIC FEEDER.

By setting the Lever attached to Clock, the wire connected with Feeders closes each Hinged Bottom. One Clock Machine will operate thirty Grain Holders at the same time. There being a Grain Holder for each Stall, the horses can have the kind and quantity of food desired at any time of the day or night, by simply setting the Alarm Clock, which by the revolution of its key on the back of Clock at the time of alarm, draws the upright lever, releasing the wires, thus allowing the Traps in Grain Holders to open and drop the Grain into Mangers.

The Machines are new, easy to adjust, and can be run by anybody. The Grain Holders which are made of Iron are designed to be placed over the manger either in the Stall or in the Loft above, as most convenient to the owner.

By this method the Horse is allowed ample time for feeding and digesting his food before being brought from the Stable.

Those using these machines, and keeping a large number of horses, tell us, that by feeding them all at the same time, the saving of their Stable Floors and Stall Partitions pay for the Machines, as all kicking and pawing, caused by the uneasiness of the horses hearing the others fed, is stopped.

We would say to those having the care of their own horses that many hours and steps are saved by the use of this Feeder. The assurance that your Horses, when put up in a heated condition, can be fed at a proper time, without your having to return, is also well worth your consideration.

Feeder for each Stall	\$2 00
Clock Machine for Operating Feeders	4 00

These Feeders are fast growing in favor and are extensively used in many of the large stables in New York, Brooklyn and vicinity.

When found necessary to operate Feeders in opposite Stalls, corner Pulleys are furnished.

Can be seen in operation in our show-room.

WOODEN GRAIN HOD.

PLATE 13-P.

The hollow casting that is sent with each order is designed to connect a small box, or one that is shown in Plate 13-P with a handle, which forms a light Hod for filling the Grain Holders, when placed in a position too high to fill by Hand. We do not furnish the hod.

Directions for putting up and using the Feeders, furnished on application.

CAST IRON MANGER AND WROUGHT IRON HAY RACK.

WITH ADJUSTABLE EXTENSION ATTACHMENTS AT ENDS.

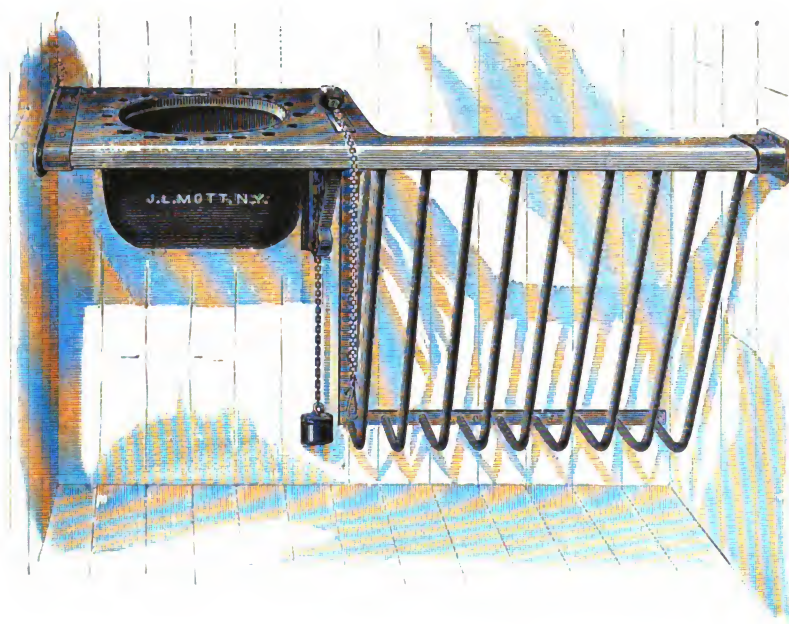

PLATE 14-P.

Left.—Furnished Right and Left.

	Painted.	Manger Galvanized.	Manger Enameled.
Length, 4 feet 6 inches; width, 2 feet, Hay Rack, 2 feet 6 inches deep	\$26 00	\$28 75	\$29 50
All Galvanized		40 00	
Any length over 4 feet 6 inches up to 5 feet, width, 2 feet.....	28 00	30 75	31 50
All Galvanized.....		42 50	
Any length over 5 feet up to 5 feet 6 inches, width, 2 feet....	30 00	32 75	33 50
All Galvanized.....		45 00	
Any length over 5 feet 6 inches up to 6 feet, width, 2 feet ...	32 00	34 75	35 50
All Galvanized.....		47 50	

Any length longer than priced above furnished to order at an increased cost.

The above is a very desirable arrangement of Halter Chain, as it passes over a Pulley within a hollow bracket, having variable Weight and Rubber Buffer.

When Manger is furnished with patent removable bottom, as shown in Plates 51-P and 52-P, add \$1 75.

CAST IRON MANGER AND WROUGHT IRON HAY RACK.

WITH ADJUSTABLE EXTENSION ATTACHMENTS AT ENDS

PLATE 15-P.

Left.—Furnished Right and Left.

	Painted.	Manger Galvanized.	Manger Enameled.
Length, 4 feet 6 inches; width, 2 feet; Hay Rack, 2 feet 6 inches deep.....	\$24 00	\$26 75	\$27 50
All Galvanized ..		38 00	
Any length over 4 feet 6 inches up to 5 feet, width, 2 feet.....	26 00	28 75	29 50
All Galvanized.....		40 50	
Any length over 5 feet up to 5 feet 6 inches, width, 2 feet	28 00	30 75	31 50

Any length over 5 feet 6 inches up to 6 feet, width, 2 feet.....	30 00	32 75	33 50
All Galvanized.....		45 50	

Any length longer than priced above furnished to order at an increased cost.

The above is a very desirable arrangement of Leather Halter Strap, with Weight and Back Guide.

When Manger is furnished with patent removable bottom, as shown in Plates 51-P and 52-P, add \$1 75.

CAST IRON MANGER, WATER POT AND WROUGHT IRON HAY RACK.

WITH ADJUSTABLE EXTENSION ATTACHMENTS AT ENDS.

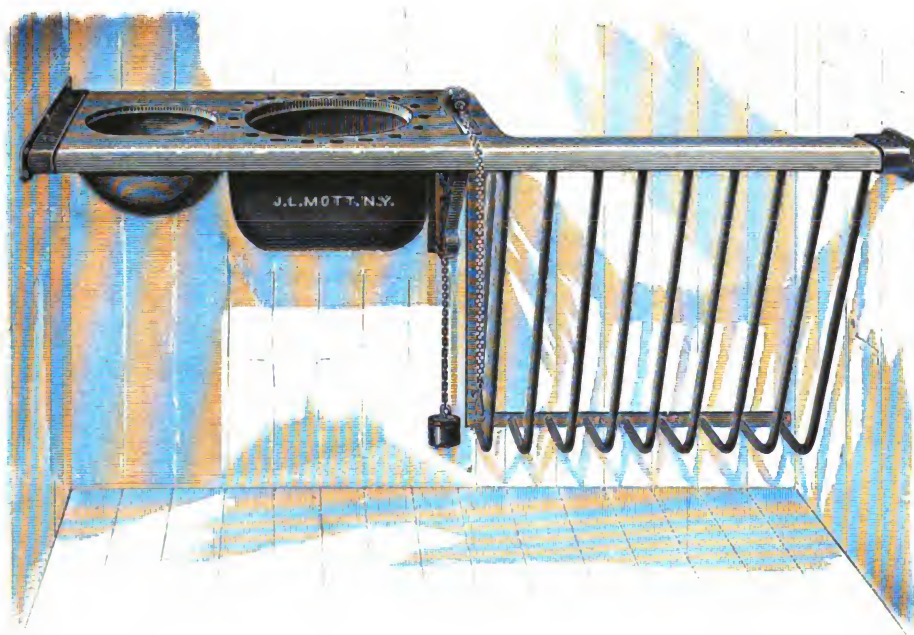

PLATE 16-P.

Left.—Furnished Right and Left.

	Painted.	Water Pot and Manger Galvanized	Water Pot and Manger Enameled
Length, 5 feet; width, 2 feet; Hay Rack, 2 feet 6 inches deep.....	\$35 00	\$39 50	\$40 25
All Galvanized.....		50 00	
Any length over 5 feet up to 5 feet 6 inches, width, 2 feet	37 00	41 50	42 25
All Galvanized		52 50	
Any length over 5 feet 6 inches up to 6 feet, width, 2 feet.....	39 00	43 50	44 25
All Galvanized.....		55 00	

Any length longer than priced above furnished to order at an increased cost.

The above is a very desirable arrangement of Halter Chain, as it passes over a Pulley within a hollow bracket, having variable Weight and Rubber Buffer.

When Manger is furnished with patent removable bottom, as shown in Plates 51-P and 52-P, add \$1 75.

CAST IRON MANGER AND WROUGHT IRON HAY RACK.

WITH HAY GRID AND HEAVY ROLLING FRONT.

WITH ADJUSTABLE EXTENSION ATTACHMENTS AT ENDS.

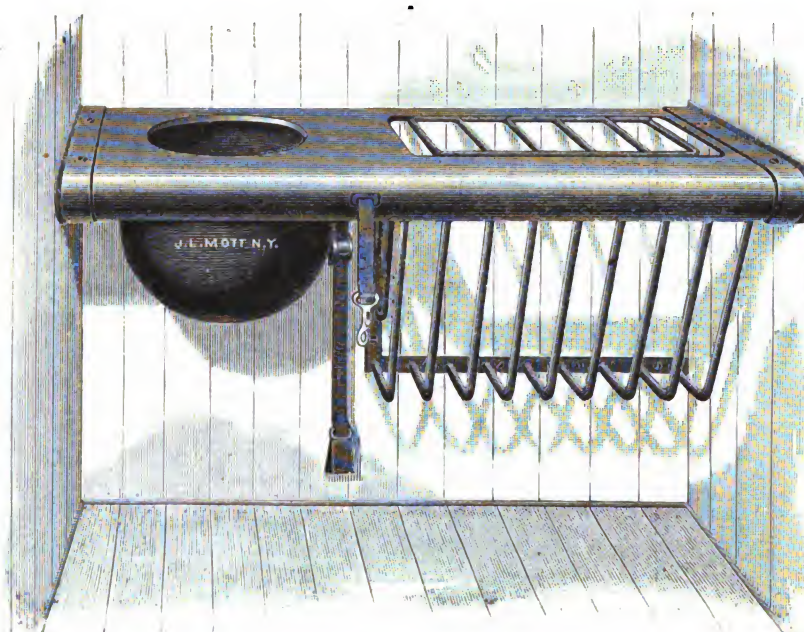

PLATE 17-P.

Left.—Furnished Right and Left.

	Painted.	Manger Galvanized.	Manger Enameled.
Length, 4 feet 6 inches; width, 2 feet; Hay Rack, 1 foot 6 inches deep.....	\$41 00	\$43 75	\$45 50
All Galvanized.....		56 00	
Any length over 4 feet 6 inches up to 5 feet, width, 2 feet.....	43 50	46 25	48 00
All Galvanized.....		58 50	
Any length over 5 feet up to 5 feet 6 inches, width, 2 feet.....	46 00	48 75	50 50
All Galvanized.....		61 00	
Any length over 5 feet 6 inches up to 6 feet, width, 2 feet ...	48 50	51 25	53 00
All Galvanized.....		63 50	

Any length longer than priced above furnished to order at an increased cost.

If furnished without Hay Grid, deduct \$7 00.

The above is very highly recommended, and the large Rolling Front with Leather Halter Strap, Weight and Back Guide makes a most excellent Fixture.

The Hay Grid is designed to prevent waste of hay. When the rack is to be filled the Grid is lifted and then laid on the top of the hay.

The hay is reached through the bars of the Grid which follows the hay as it decreases in bulk and prevents the horse pulling out more than a mouthful at a time.

It can be fitted to any of the Fixtures that have low hay racks.

CAST IRON MANGER AND WROUGHT IRON HAY RACK.

WITH ADJUSTABLE EXTENSION ATTACHMENTS AT ENDS.

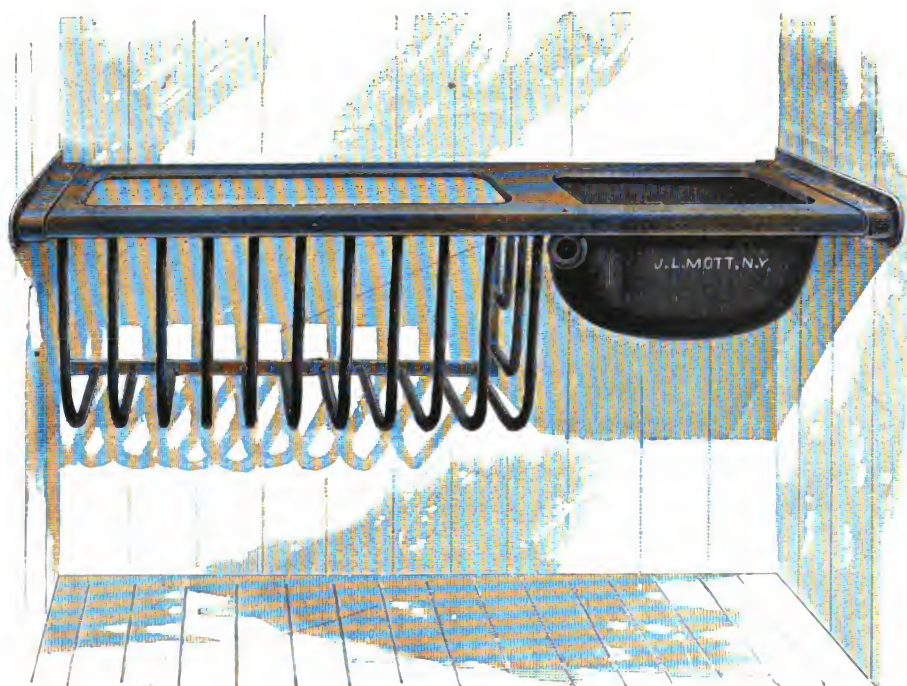

PLATE 18-P.

Right.—Furnished Right and Left.

	Painted.	Manger Galvanized.	Manger Enameled.

"IMPERIAL" PORCELAIN CORNER MANGER, WITH ORNAMENTAL IRON BRACKET.**PLATE 37-P.**

Length on side, $21\frac{1}{2}$ inches; inside depth, $10\frac{1}{2}$ inches.

"Imperial" Porcelain Corner Manger only.....	\$28 00
" " " " with Ornamental Iron Bracket, Bronzed	36 00
" " " " " " " " Galvanized.....	40 00

We invite the attention of Architects and all who are interested in fitting up fine stables to the superior excellence and beauty of our "IMPERIAL" PORCELAIN WARE, which is manufactured in England exclusively for us, we being the Sole Importers. It will recommend itself for its excellence in being non-absorbent and requiring no labor to keep it clean, being readily wiped out with a sponge, and possessing a perfect glaze in all its parts. As designed for a Corner Manger, with its substantial and ornamental Galvanized or Bronzed Iron Bracket, it cannot be excelled as a fine Fixture.

"IMPERIAL" PORCELAIN MANGER.**PLATE 38-P.**

Length, 4 feet 2 inches; width, 18 inches; inside depth, 11 inches; outside depth, 14 inches.

Price	\$30 00
-------------	---------

The above illustrates our "IMPERIAL" PORCELAIN DOUBLE MANGER, and is designed for the head of Open Stalls and to be supported on brackets and faced up in front with hard wood.

MOTT'S CLEAN-OUT MANGER, WITH OAT-SIFTING AND REMOVABLE BOTTOM.

PATENTED FEBRUARY 16TH, 1886.

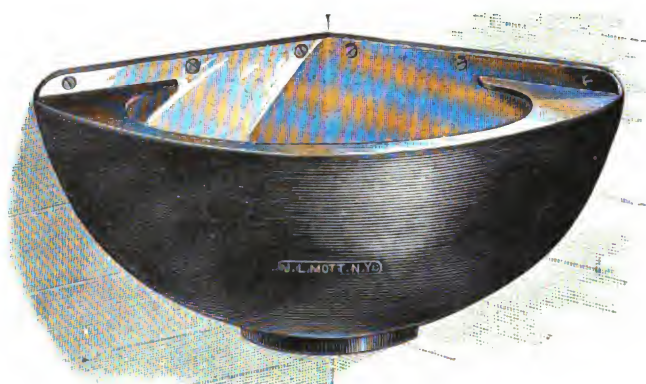

PLATE 50-P.

With Food Guard in Front and Extra Large Food Guard in Corners.

Length on side, 17 inches; depth, 10 inches.

	Plain.	Galvanized.	Enameled.
Price.....	\$3 50	\$6 00	\$8 00
" when made to swing, see Plate 72-P.....	4 50	7 00	9 00

Each Manger is furnished with both SIEVE and SOLID REMOVABLE BOTTOMS, as shown in sectional cuts below.

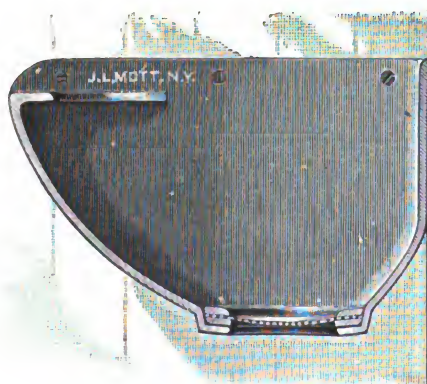

PLATE 51-P.

PLATE 52-P.

The above is a very simple and novel arrangement whereby the dust in the feed is allowed to pass through the wire sieve bottom, as shown in Plate 51-P. It can be also used with solid bottom, as shown in Plate 52-P, and in either case the adjustable bottom furnishes a simple and most effectual method of emptying and cleaning the Manger.

VENTILATING CORNER MANGER.

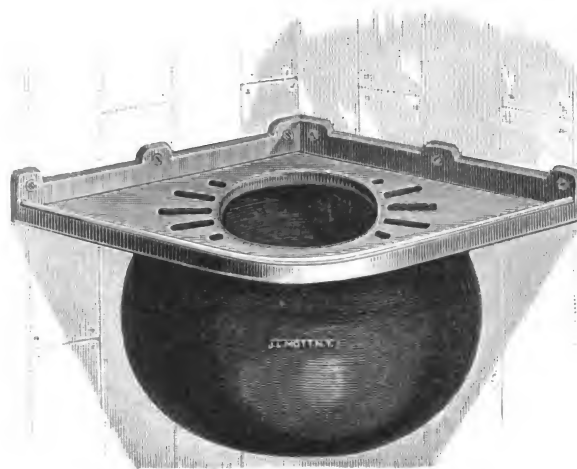

PLATE 53-P.

Length on Side, 18 inches; depth, 12 inches. Diameter of Pot, 18 inches.

	Plain.	Galvanized.	Enameled
Price	\$6 00	\$10 50	\$11 00

As can be seen, this Manger effectually prevents any waisting of oats, while the holes at sides of opening furnish ventilation.

VENTILATING CORNER MANGER.

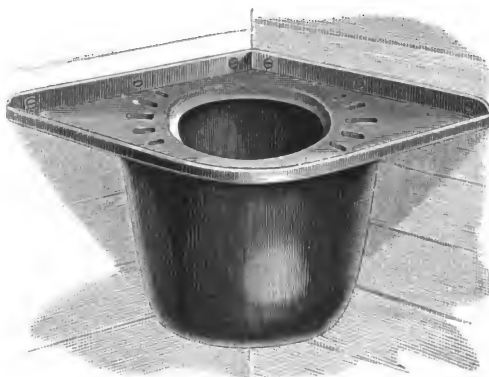

PLATE 54-P.

Length on side, 15½ inches; depth, 10 inches.

	Plain.	Galvanized.	Enameled.
Price	\$3 50	\$6 50	\$7 00

This Manger is so constructed as to effectually prevent any wasting of oats. The holes at sides of opening furnishing ventilation.

CORNER MANGER.

PLATE 55-P.

Length on side, 17½ in.; depth, 11 in. Diameter of Pot, 14 in.

	Plain.	Galvanized.	Enameled.
Price	\$3 75	\$6 75	\$8 50

The above Manger is strongly recommended, being furnished with an effectual Food Guard all around, thus preventing any waste of oats.

RIGHT AND LEFT CORNER MANGER.

MOTT'S IMPROVED DIVISION FOR OPEN STALLS.

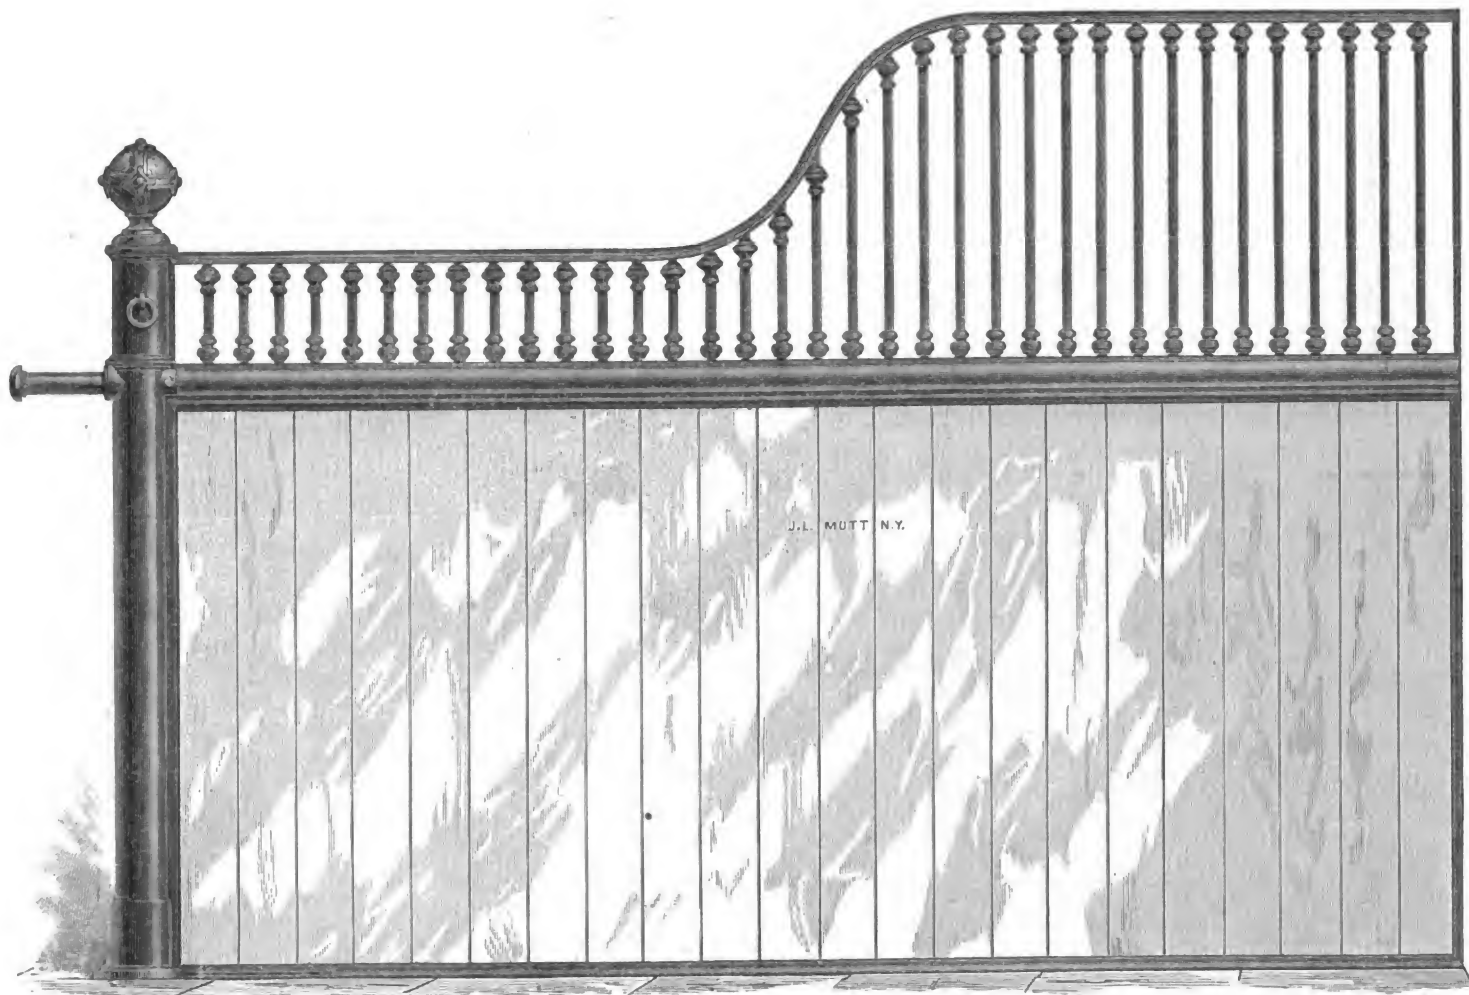

PLATE 185-P.

Consisting of Iron Pillar, 5 inches diameter, fitted with Brass Rings for Pillar Chains, Ornamental Stall Guard, with $\frac{5}{8}$ or $\frac{3}{4}$ inch Round Iron Uprights, Mott's Improved Sliding Barrier, Cap and Wall Rail to receive 2 inch Wood Partition, and Sill with Shifting Piece close to bottom of Pillar. Woodwork can be replaced. Guard is 2 feet 6 inches high.

The Barrier slides through a "Sheath" or strong Iron Tube under Stall Guard, passing out through the Heel Post, with a Brass Knob on the end. The Attendant, as he leaves the Stable, pulls the Barrier out of each Stall and fastens to the opposite wall; thereby confining the Horse to his Stall should he break loose.

We can fit an additional Barrier to each division through centre of Woodwork at extra cost.

Price of sets of Mott's Improved Division, except Wood Partitions.

Length, 8 feet 0 inches over all		Painted one Coat.

For prices of Box Stall Guards, see Plate 147-P; and Box Stall Posts, see Plate 228-P.

NOTE—Sheet Iron Panel Ends, as shown in Plate 130-P, furnished to order. The above Guard we also furnish in Polished Iron with Solid Bronze Ornaments, all Solid Brass or Bronze, or Nickel-plated. Prices on application.

"RENAISSANCE" STALL GUARD.

PATENTED MARCH 16TH, 1886.

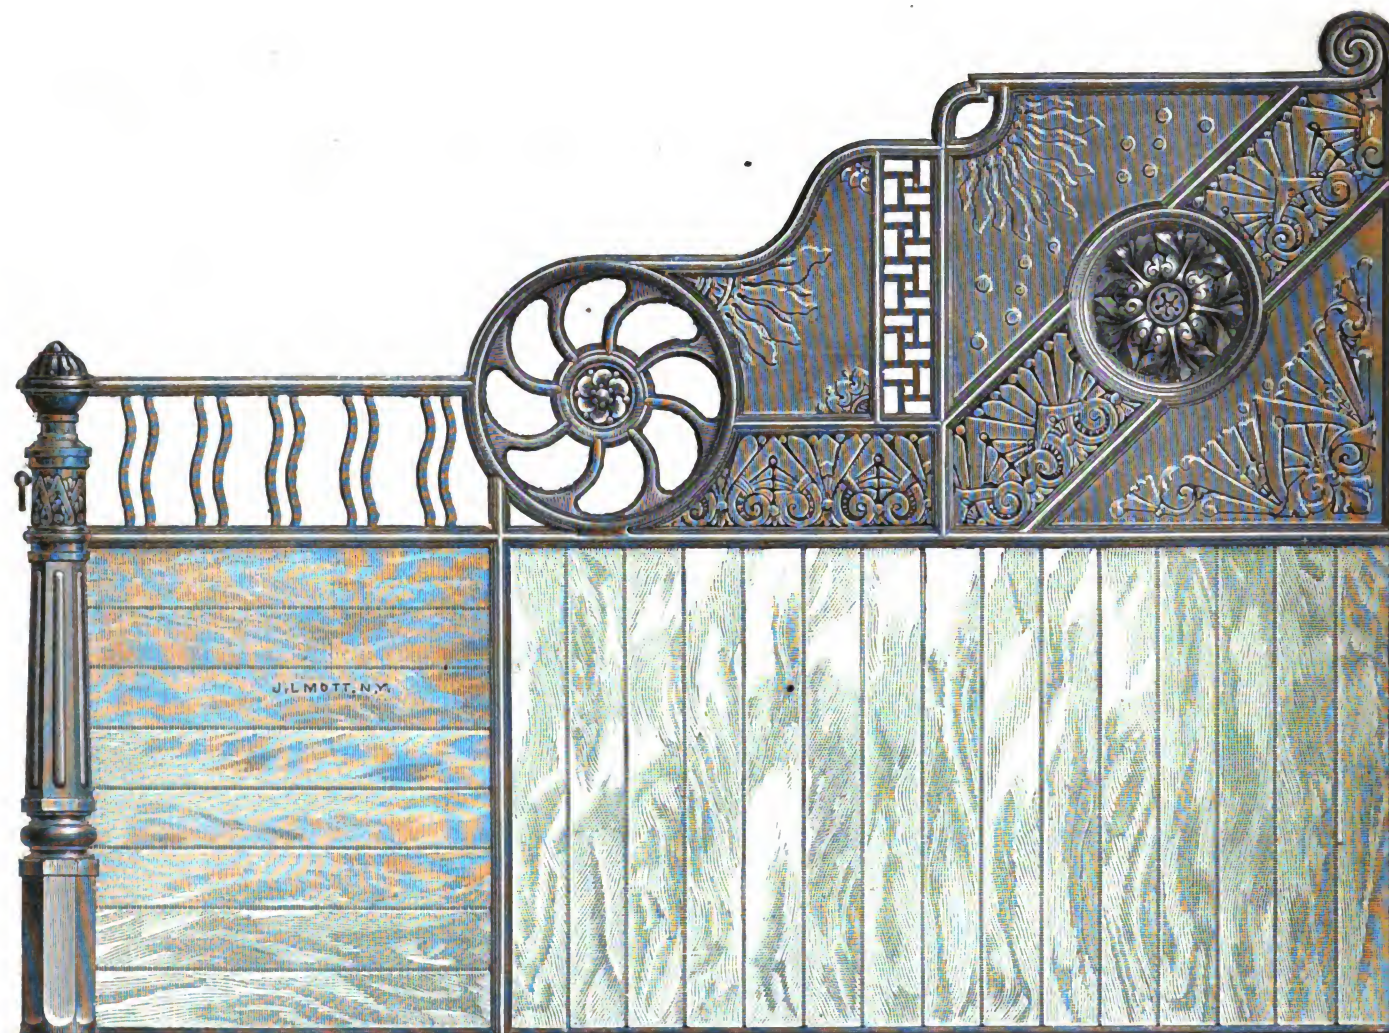

PLATE 186-P.

We present the above to our patrons not only as a thoroughly reliable and durable Guard for fine work, but we challenge comparison as a work of art, both in design and finish, with anything of the kind made either here or in Europe.

It consists of Stall Guard fitted to Stall Post, Moulded Iron Ramp Rail, Middle and Bottom Rail, also Vertical Rail to allow of the Woodwork being fixed part horizontally, and being renewed when injured.

Half sets, *i. e.* having design on one side only, furnished for Side Walls.

Monogram can be substituted for Centre Ornament when desired.

Price of sets as described above, except Wood Partition.

		Painted one Coat.
One size only.	Length, 8 feet 4 inches over all	\$95 00
Guard "	" 7 " 10 " including necessary Cap, side and bottom Rails	75 00

"RENAISSANCE" BOX STALL GUARD.

PATENTED.

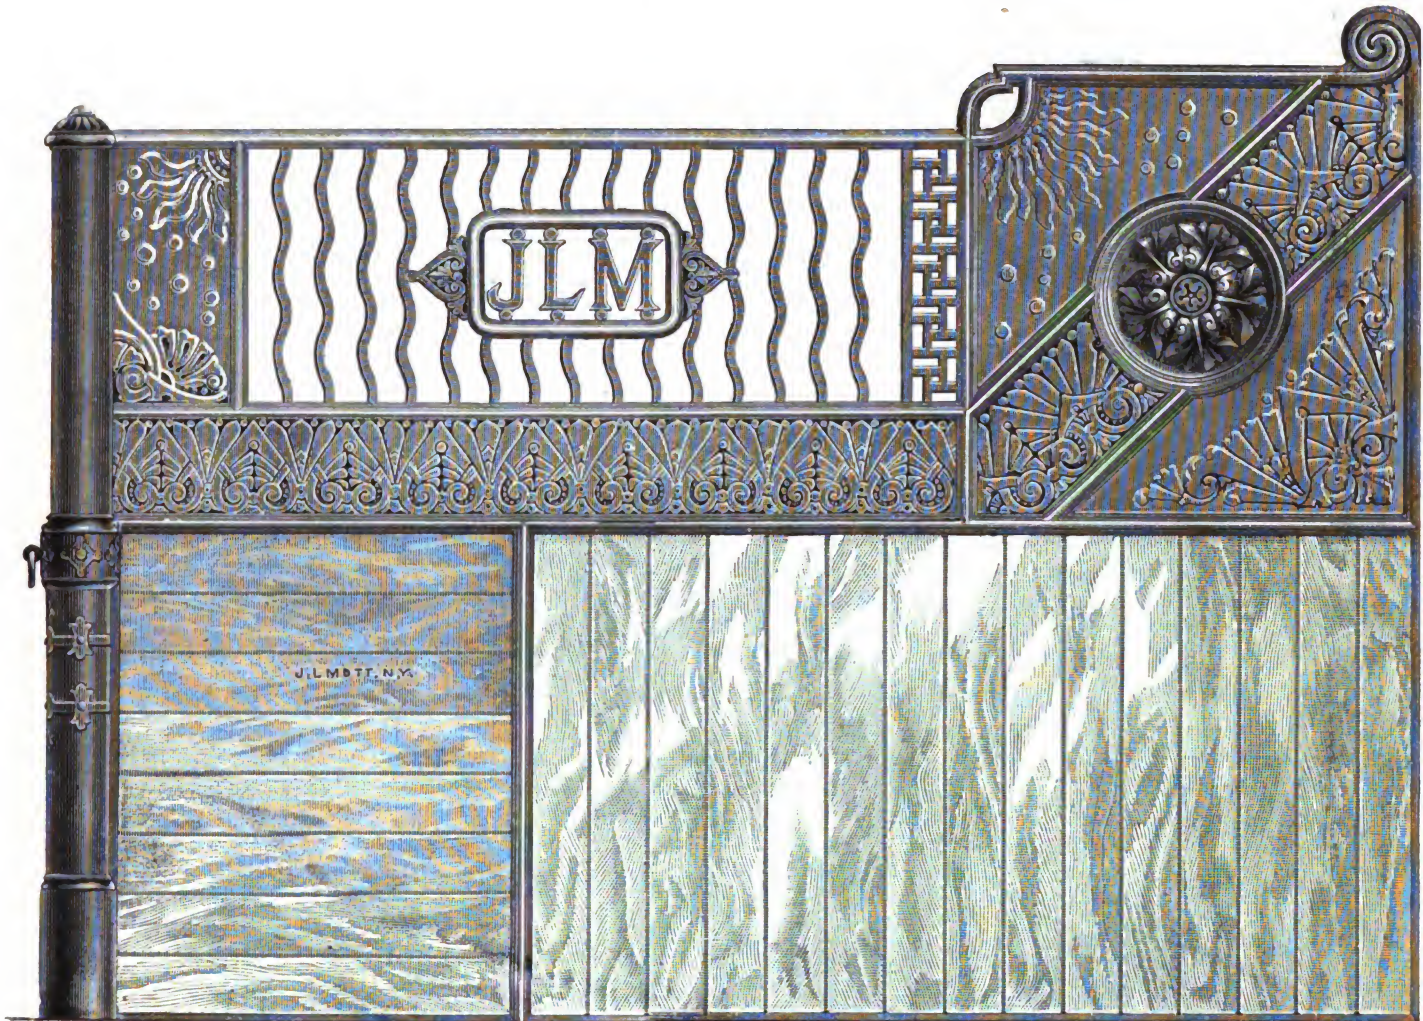

PLATE 187-P.

The above illustrates our design of Box Stall Guard, as otherwise described in Plate 186-P.

It consists of Box Stall Guard fitted to Post, Moulded Iron Ramp Rail, Middle and Bottom Rail, also Vertical Rail to allow of the Woodwork being fixed part horizontally, and being renewed when injured.

Half sets, *i. e.* having design on one side only, furnished for side Walls.

Price of sets as described above, except Wood Partition.

		Painted one Coat.
One size only. Length, 8 feet 4 inches over all	\$100 00
Guard " " 7 " 10 " including necessary Cap, side and bottom Rails	75 00
Stall Post " One height, 6 feet 11 inches, and made to receive 2 inch Wood Partition only	25 00

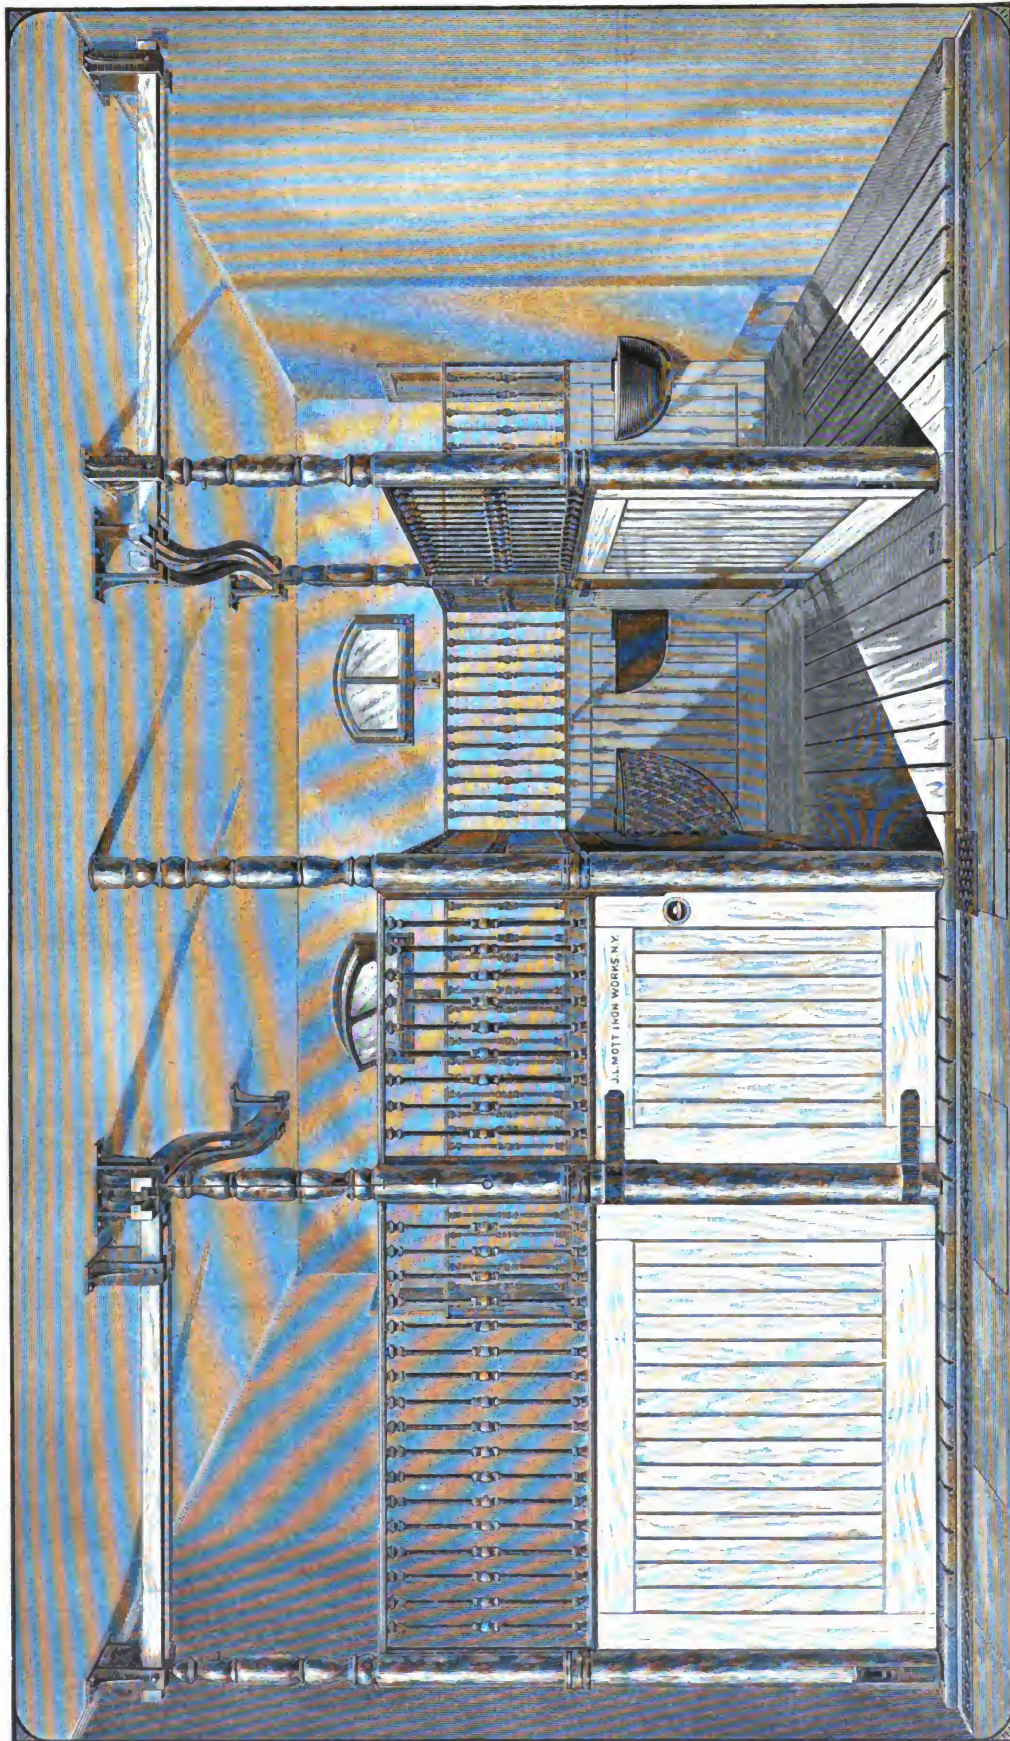

PLATE 188-P.

METZGER'S PATENT CONVERTIBLE BOX AND OPEN STALLS.

Designed to show one Box and two Open Stalls, with necessary Iron Fittings to accomplish the change. For particulars and description, see opposite page.

METZGER'S PATENT CONVERTIBLE BOX AND OPEN STALLS.

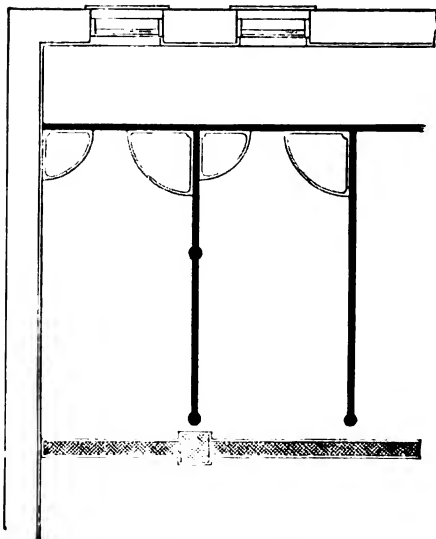

PLATE 189-P.

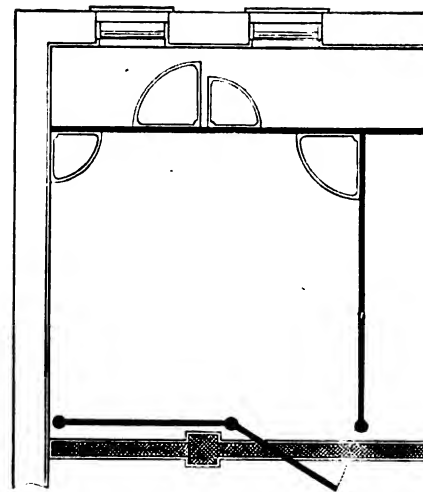

PLATE 190-P.

We illustrate on opposite page a most ingenious and simple method of converting Open Stalls into Box Stalls and *vice versa*. The Fittings can be seen in practical working in our Show Rooms, where, to gain a full knowledge of their merits, a visit is requested from those interested.

They have been adopted in many Stables, and it is generally admitted that the method is by far the best yet devised, being found in practical use to answer all requirements.

A Convertible Stall is useful wherever a Box Stall is desired, and specially advantageous in small Stables, where it can be ordinarily used in the form of a Box Stall, affording the convenience of two Open Stalls for occasional use without occupying additional space. By reference to Plates 188-P, 189-P and 190-P, a Convertible Stall may be used either as a Box Stall or as two open Stalls, and the changes are effected with the greatest ease and celerity. The details are so carried out as to make a very neat appearance, without unsightly or dangerous projections.

When used in the form of two Open Stalls, the Movable Partition is placed to divide the Box Stall into two Open Stalls, as represented in the plan Plate 189-P. When two Open Stalls are converted into a Box Stall, the Movable Partition is placed across the front of Stall, as represented in plan Plate 190-P. When the passage at head of Stalls is not desired, any of the styles of Stationary or Detachable Mangers and Hay Racks illustrated on previous pages may be used.

The Rear Gutter shown in Plate 188-P, is our Graded Gutter and Cover, Plate 278-P, while to make a perfectly level Floor, our Narrow Channel Gutter, Plate 288-P graded in bottom, makes perfect drainage.

When Floor is graded in ordinary way, the Movable Partition may be raised from Floor to accommodate the pitch.

One set of Fixtures for a Convertible Stall includes the following parts: Four Cast Iron Brackets, and the necessary Bolts for attaching the same to the Ceiling and securing the Rails to the Brackets. Two Roller Carriages to run on the Rails, and the necessary Wrought Iron Bolts for securing the Posts to the Carriages. Two heavy Flush Wrought Iron Bolts and Socket Plates for securing the lower ends of the Posts to the Floor. Two heavy Wrought Iron Flush Hinges, for hanging the Door to the rigid part of the Partition.

The order should state whether five or six inch Posts are to be used, and the thickness of Stall Partition.

Price of one set of Fixtures described above.....	\$25 00
The Swinging Manger shown is Plate 50-P, price	4 50
" " Hay Rack " " " 87-P, "	8 00

A descriptive Circular with full and explicit directions for putting up Fixtures for Convertible Stall accompanies each set, or will be mailed on application.

SECTION OF OPEN STALL DIVISION.

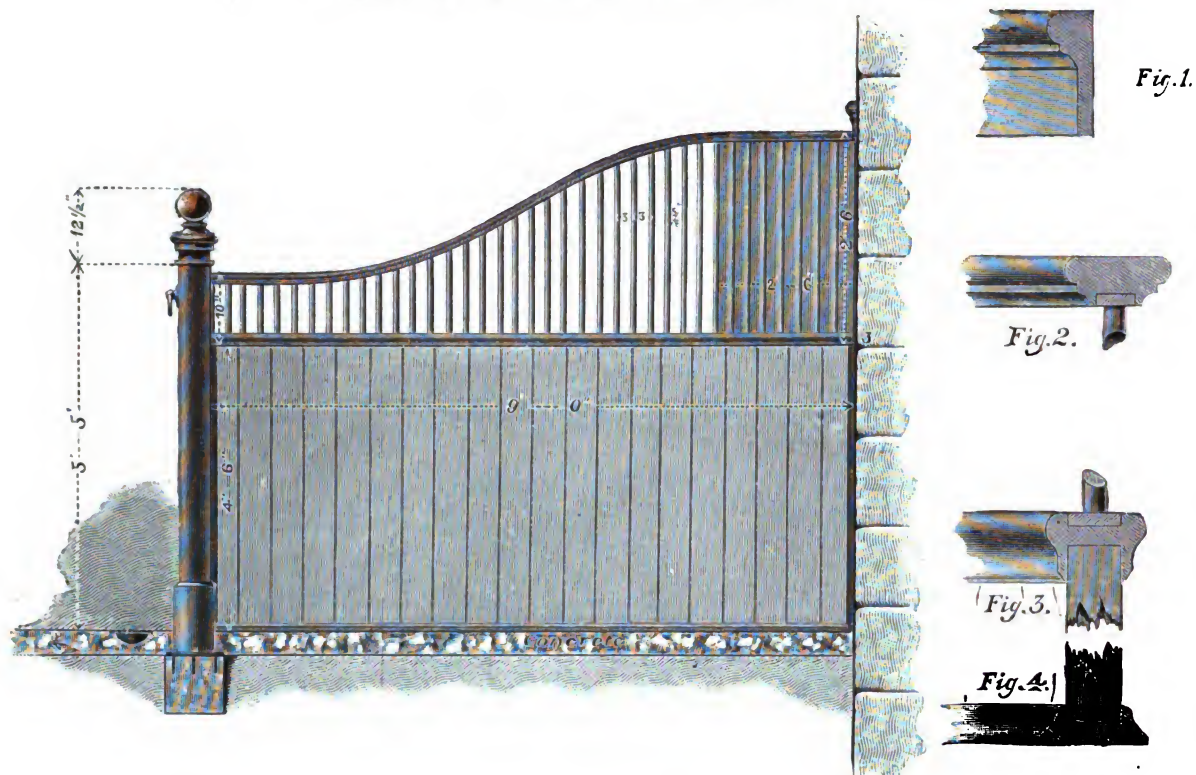

PLATE 191-P.

In above illustration is shown Stall Post for Open Stall, Stall Guard with Panel End, heavy Cast Iron Capping, (see Figure 2,) Cap Rail, (see Figure 3,) Bottom Rail, (see Figure 4,) and Wall Rail, also Iron Moulding for Tile, (see Figure 1.) Box Stall is shown in Plate 192-P.

For Fittings of above character we prefer to furnish estimates on application, thus insuring our customers a grade of work of superior excellence.

We are prepared to submit proposals for the work selected, either f. o. b. New York, or placed in position. Samples of this grade of work may be seen at our Show Rooms where we would suggest intending purchasers to personally inspect the same.

BOX AND OPEN STALLS.

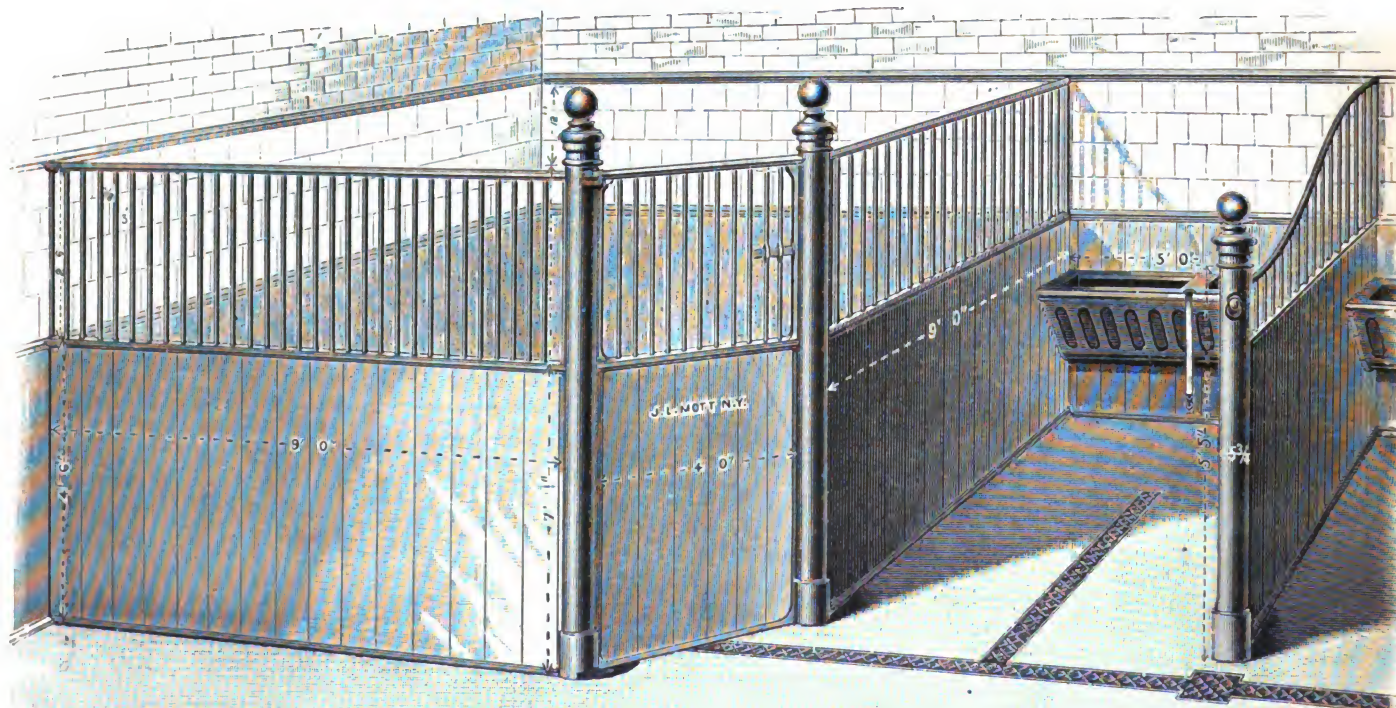

PLATE 192-P.

Above Fittings for Box Stall &c. are of same grade of work as described in Plate 191-P, and for which estimates will be furnished on application. Special attention is called to Hinges on Box Stall Door Post, Latch to Door and framing of entire Door.

SECTION OF OPEN STALL DIVISION.

PLATE 193-P.

Above we illustrate Plate 128-P Stall Guard in connection with Plate 227-P Stall Post.

SECTION OF BOX STALL.

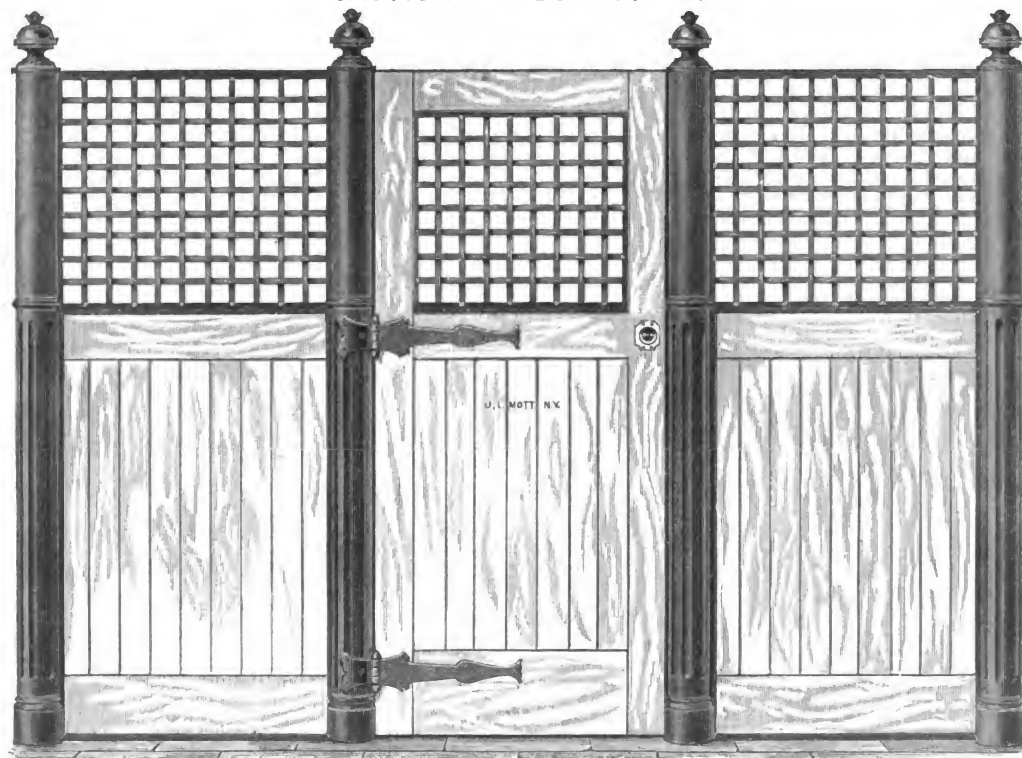

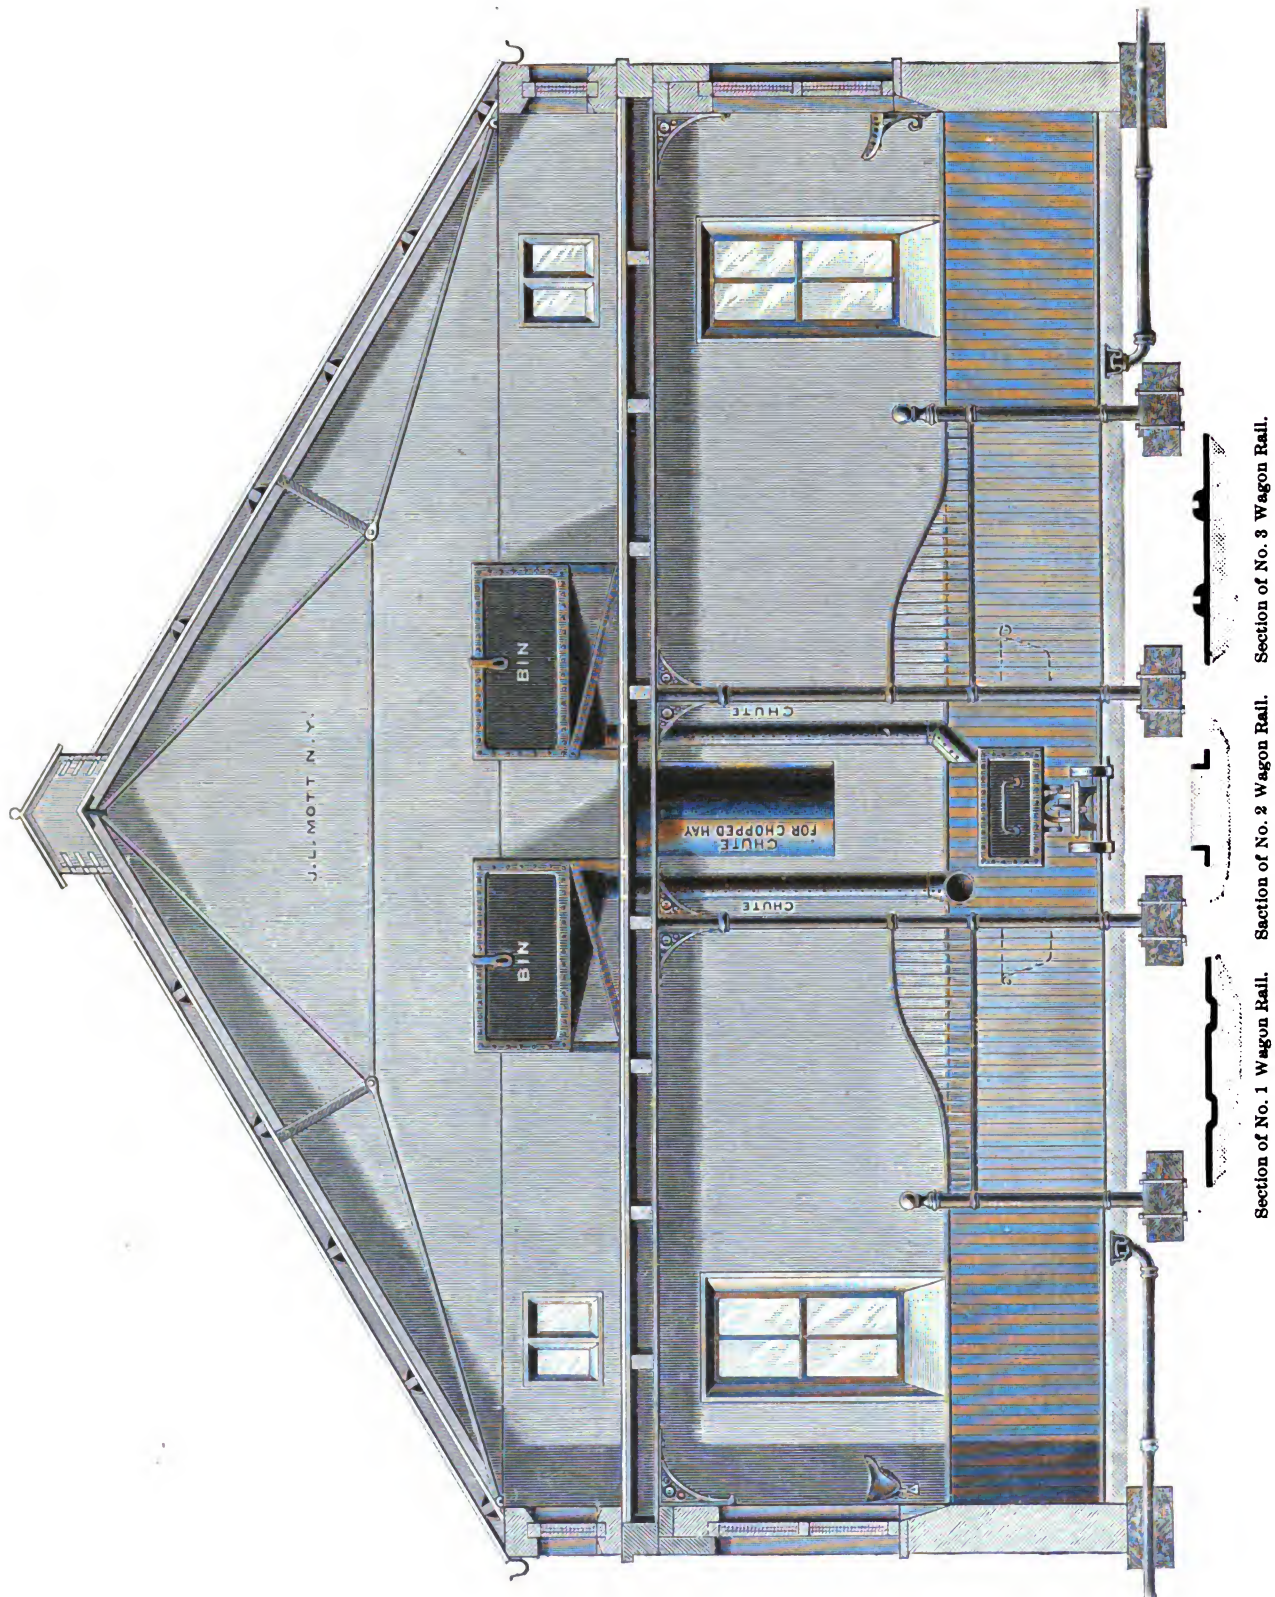

PLATE 194-P.

Above we illustrate Box Stall Posts, Plate 239-P, Flat Wrought Iron Box Stall Guards, made of two inch Square Meshes interwoven, and riveted to T Iron Frames, Cap and Bottom Rails, Wrought Iron Hinges, Lock with Brass Cup Handles, etc.

Price of Guard, made either Box or Ogee style, per square foot 70 cents.

Any length or height of Guard or height of Post furnished to order.

Section of No. 1 Wagon Rail. Section of No. 2 Wagon Rail. Section of No. 3 Wagon Rail.

TRANSVERSE SECTION of Plan of Stabling, shown on opposite page, see Plate 196-P.

The Head Posts may be used at intervals for supporting beams. In this section are also shown Heel Posts, Stall Guards and Cap Rail for Divisions, Gutters, Cesspools, and section of Wagon Rails. Any of the designs illustrated in catalogue may be substituted for those shown above. See description in Plate 196-P.

PLAN OF STALLS.

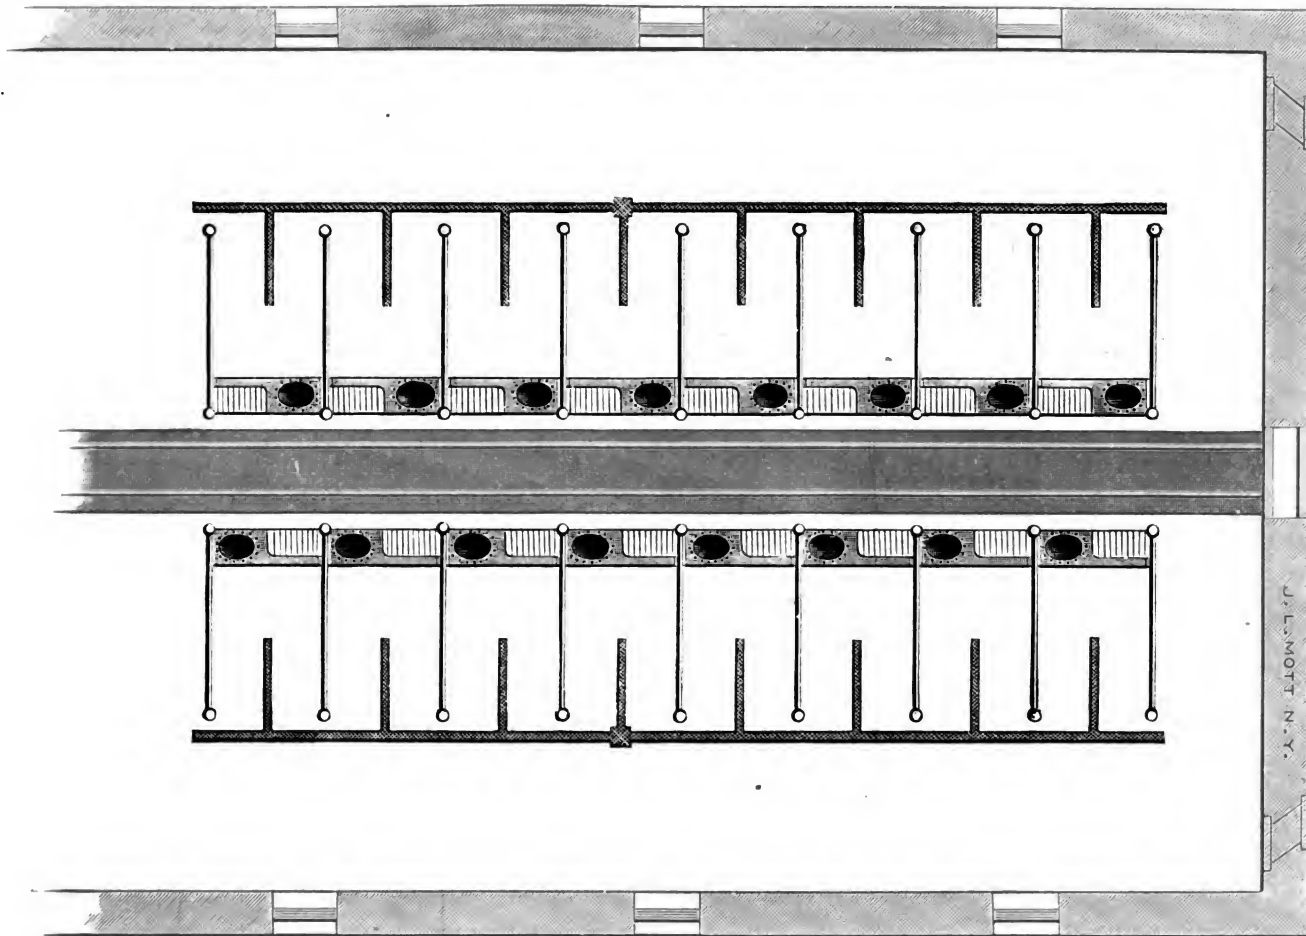

PLATE 196-P.

Plan showing Stable with Central Feeding Passage.

The arrangement is designed to accommodate a large number of Horses. The design and method of construction are illustrated in Plate 195-P.

This system is excellently adapted for extensive stables where convenience for working, cleanliness, ventilation and good accommodation must be amply provided for.

In the Central Passage is a line of Rails for Feeding Wagon.

This wagon, strongly but lightly built is supported on frame with wheels, and so constructed that it can be tilted without shifting the frame and wheels on which it is carried.

The Oats, Hay, &c. are stored above and conveyed below by means of Sheet Iron Chutes. The Grain Chutes are provided with Revolving Spout, having a Sliding Door for closing and can be turned in the required direction to deliver into the Feeding Wagon.

BOX STALL DIVISIONS, FRONTS, AND DOORS.

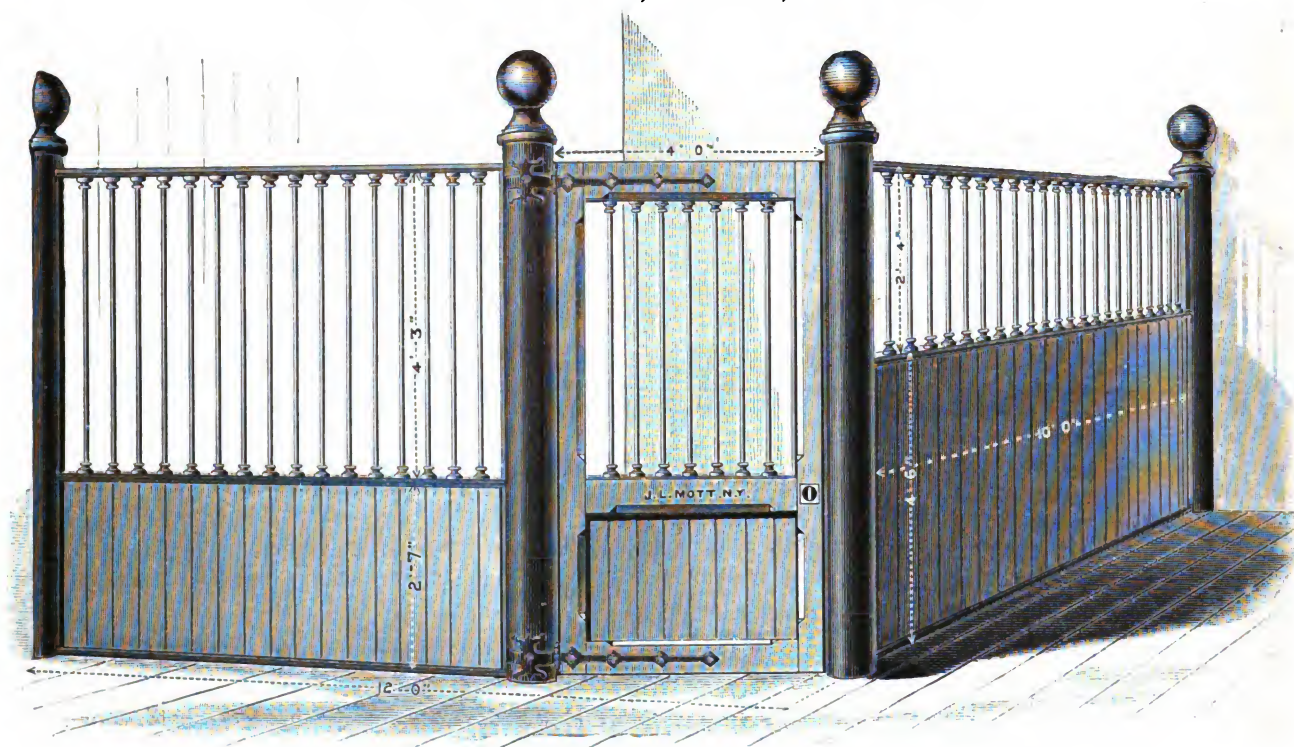

PLATE 197-P.

The Box Stall shown in above illustration secures perfect safety to the horse; its strength resisting any effort of the animal to destroy it. The Deeper Guards are used for the fronts of the Box Stalls and Doors, and the shallow ones for divisions between Boxes or Boxes and Open Stalls, and may be varied in depth. The Cap and Bottom Rail are of Cast Iron, and any design of Post, Half Post, Hinges and Locks may be used. We also furnish Guards for Open Stalls to correspond. Prices on application.

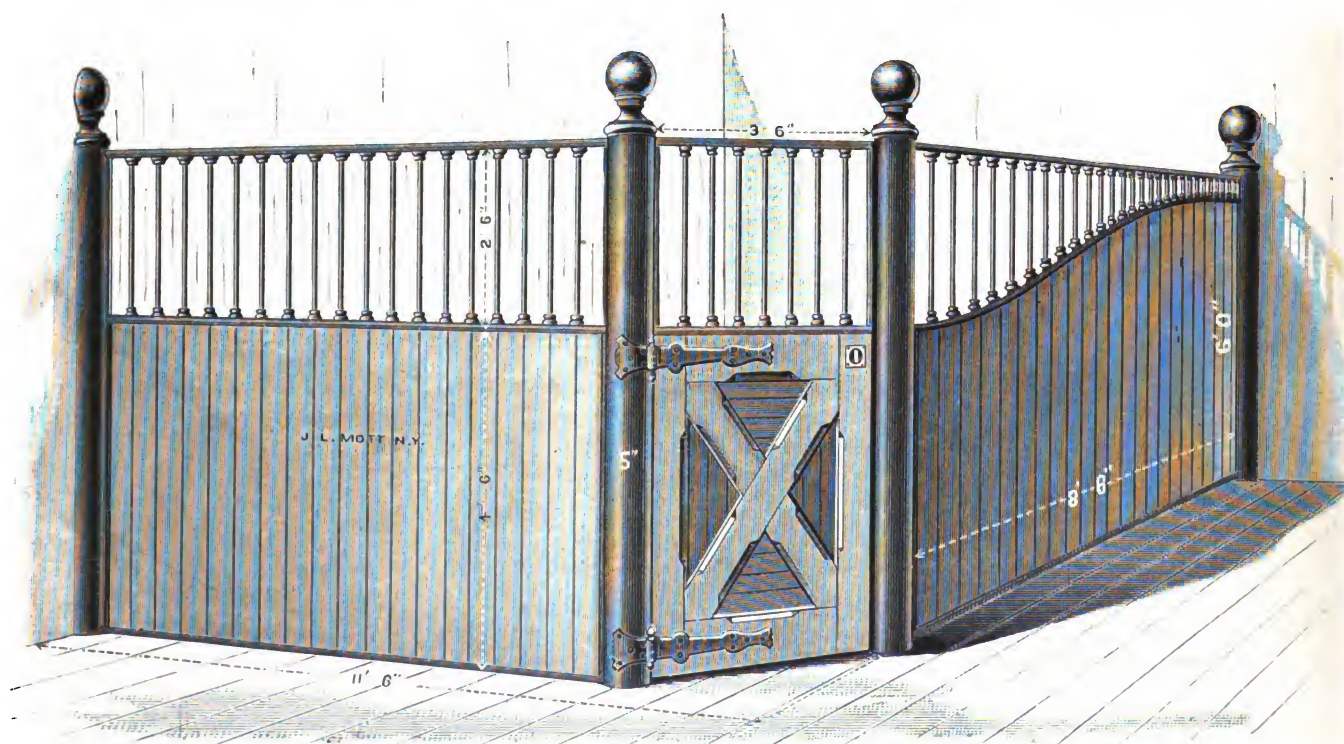

PLATE 198-P.

INVERTED GUARD FOR DIVISION TO BOX STALL. By its adoption the horse in the Stall is secluded from the one in the Box, and a complete finished appearance is given to the stable, as the curve of the inverted Guard is made to correspond with that of the Guards in Open Stall divisions, see Plate 200-P. Guards, Posts, Cap and Bottom Rail for Open Stalls furnished to correspond. For special work of this character, prices may be had on application.

BOX STALL, DIVISION FRONTS, AND DOORS.

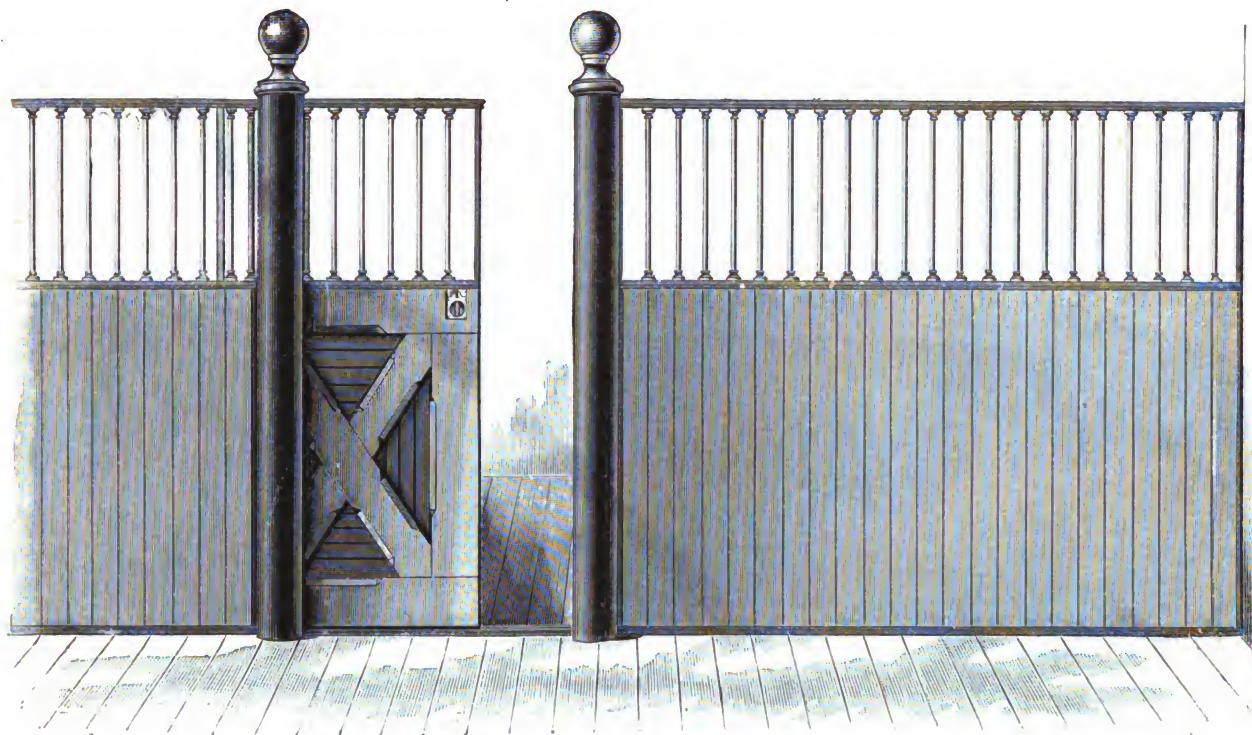

PLATE 199-P.

In above illustration is shown sliding door which may be used instead of those that swing, where room is limited. Any design of Posts and Guards, Cap and Bottom Rail may be used instead of those shown. The Bolt of Lock is flush with face of Door when open, and in no way endangering the horse.

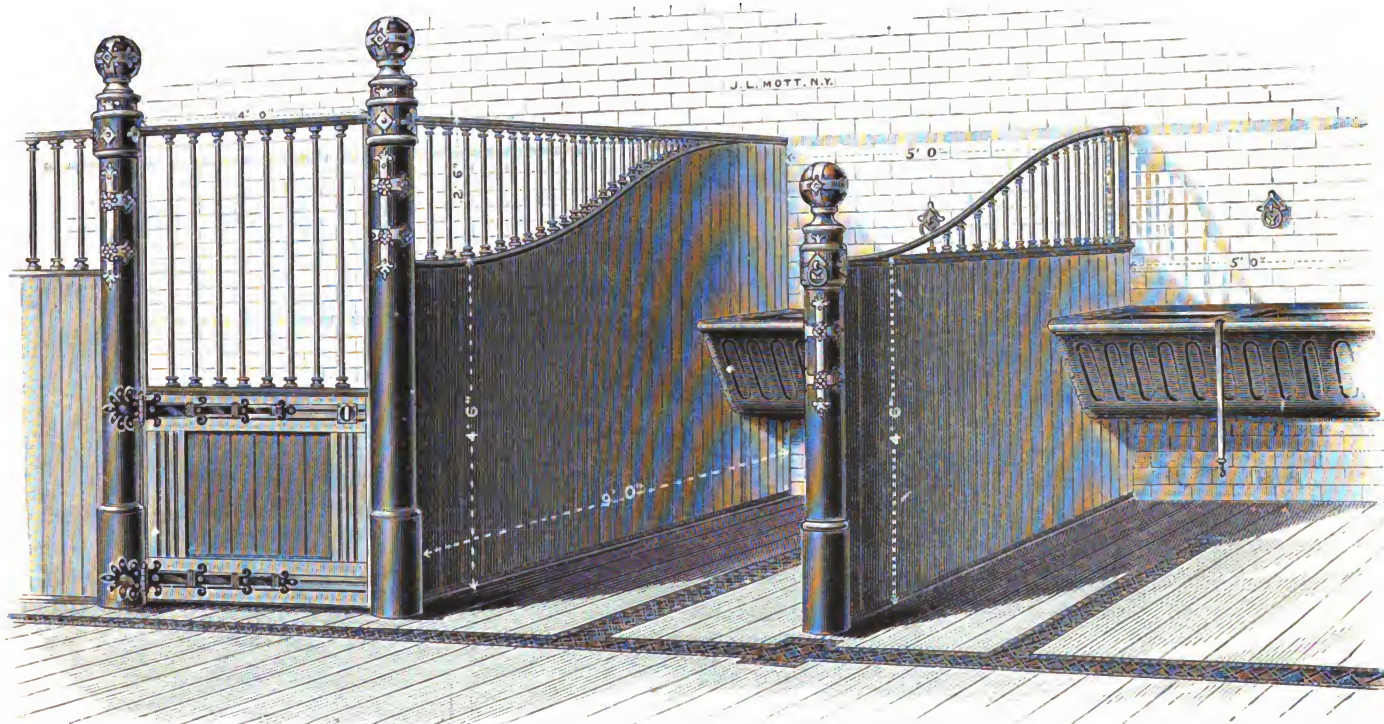

PLATE 200-P.

INVERTED GUARD FOR DIVISION TO BOX STALLS. By comparison with Plate 198-P it will be seen that the above illustrates more fully the advantages of this style of Fittings.

Any of our designs of Stall Posts, Gutters, Mangers, &c. may be substituted for those shown. Prices on application.

ORNAMENTAL STALL FITTINGS.

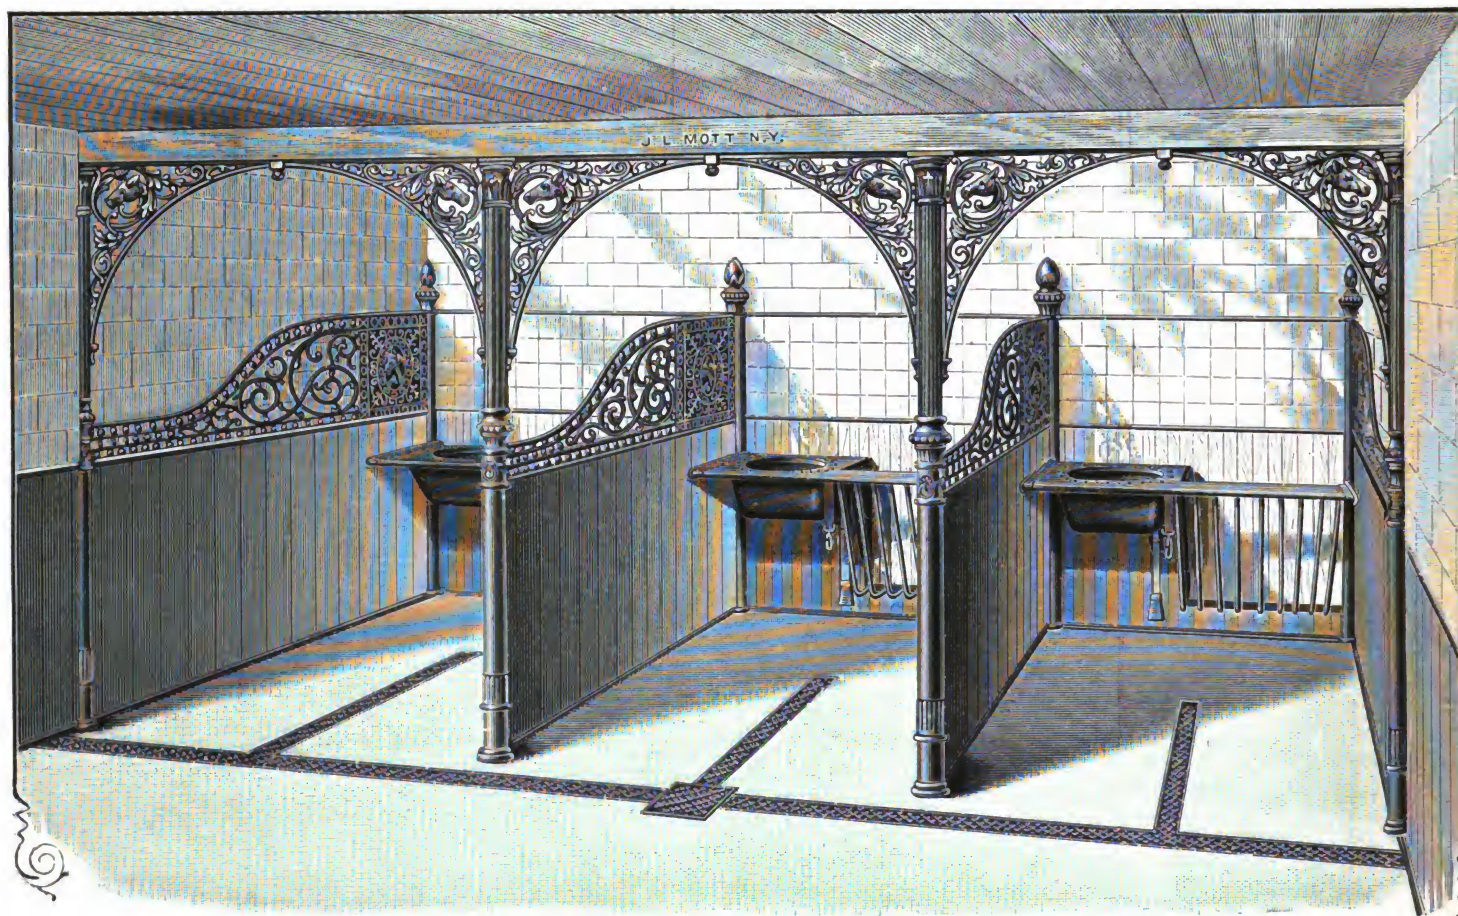

PLATE 201-P.

Interior view of three Stalls.

This arrangement of Stabling is very elegant in design, and substantial in construction.

Heel Posts, (see Plate 248-P,) 10 feet high for central division are elongated tapering to ceiling, having Ornamental Spandril Brackets at top. Half Posts at wall.

Cast Iron Stall Guards with Ornamental Panels at Heads. Cap and Bottom Rails. Half Top, Centre and Bottom Rails for receiving Tiles and Wood Lining at Head of Stalls.

Box Stall Divisions of similar design furnished any length. Stall Posts of similar design are also furnished suitable in height for both *Open* and *Box Stalls*, when desired not to extend to ceiling.

We furnish estimates for this class of Fittings, either for the work made ready for placing and f. o. b. New York, or placed in position.

To intending purchasers we would suggest a personal inspection of this grade of work from samples in our Show Rooms.

The Ornamental Spandril Brackets illustrated above in connection with Ceiling Posts, are suitable for Stalls 5 feet wide from centre of Partitions.

SECTIONS OF BOX STALLS.

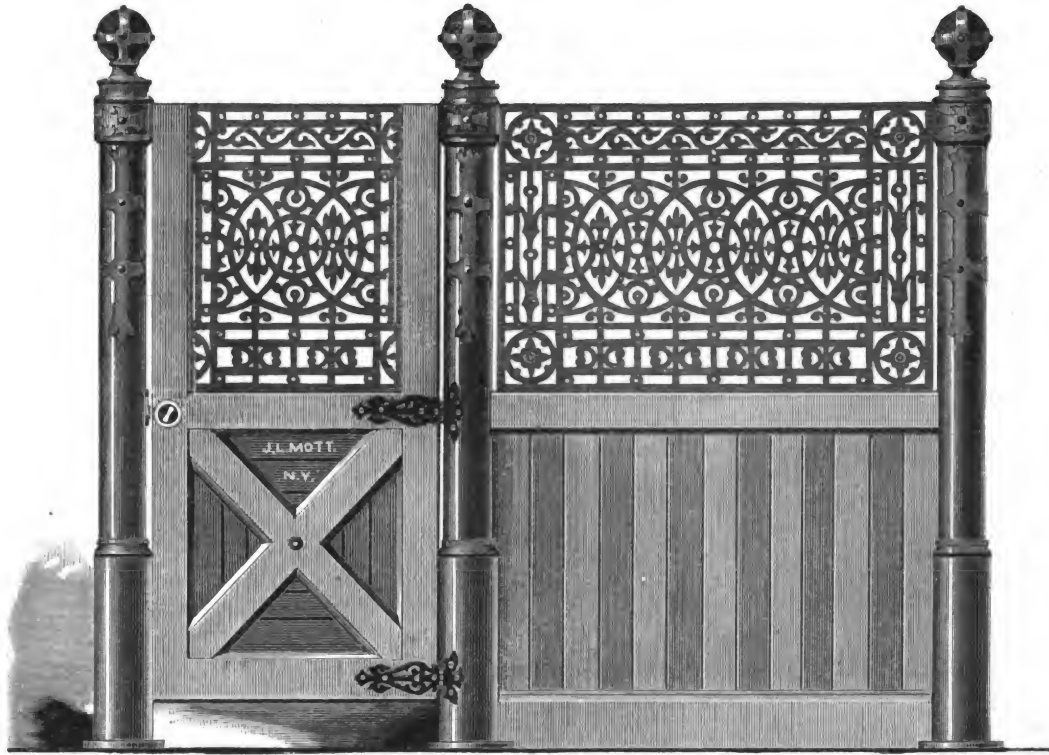

PLATE 202-P.

Above illustrates a very desirable manner of fastening Door Guard between the Stiles of the Door. For description of Guard, Posts, etc., see Plate 203-P.

NOTE—In giving order for Door Guard, mention should be made which manner of fastening is preferred, and reference made to the Plate illustrating it.

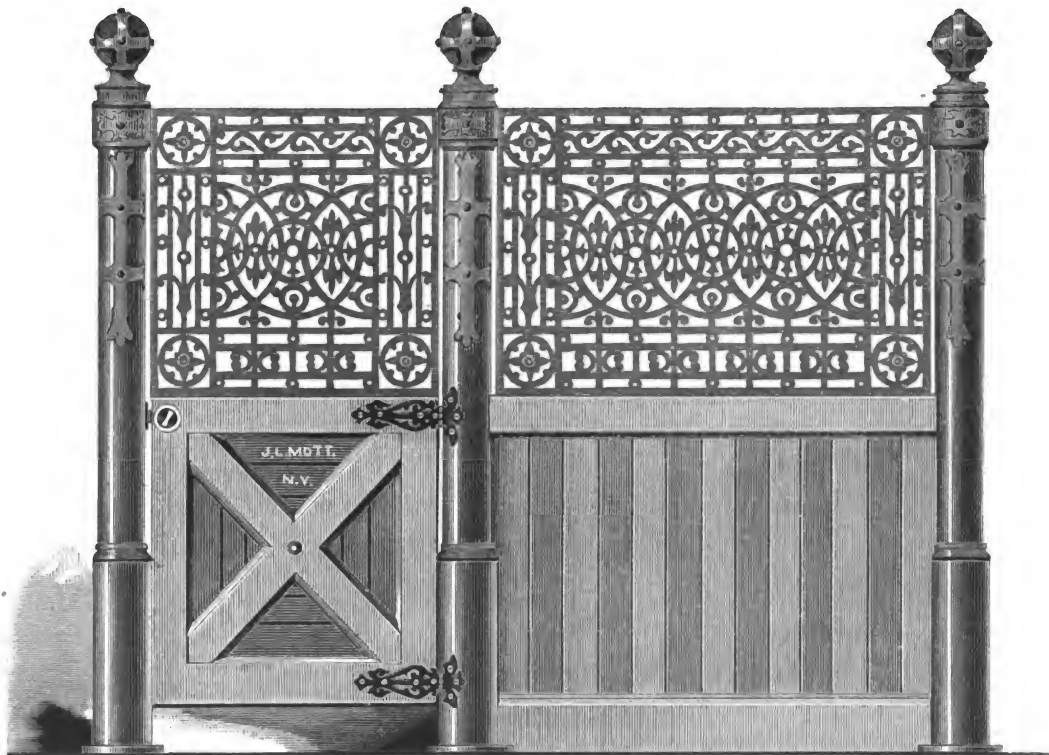

PLATE 203-P.

In above illustration is shown Box Stall Guard, 2 feet 10 inches high, Plate 125-P, Box Stall Posts, Plate 243-P. The Hinges shown are our Wrought Iron Hinges, with Ornamental Cast Iron Covers. The manner of fastening Door Guard to Door is by Wrought Iron Straps, which extend from top of Guard on either side and are sunk flush into the wood, see Plate 205-P. Any length of Box Stall Guard or height of Post furnished to order.

NOTE.—In giving order for Box Stall Guards, the distance should be given between each Post, also the width of opening for Door.

SECTIONS OF BOX STALL DOORS.

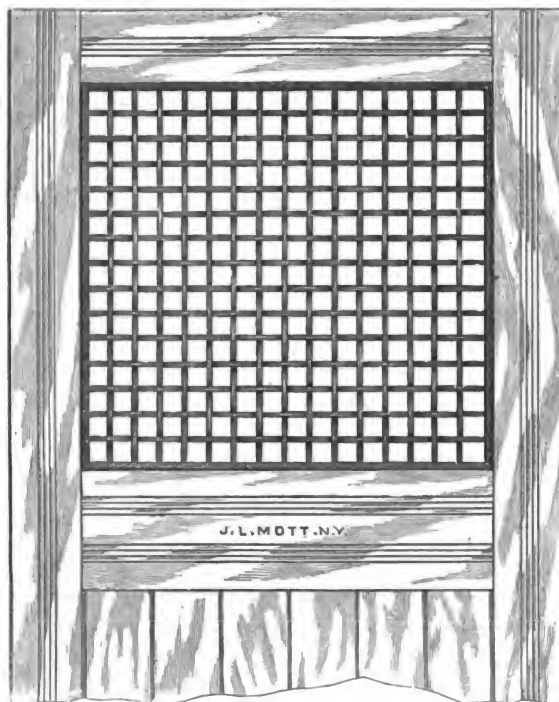

PLATE 204-P

The above illustrates the manner of fastening Door Guard to Wood all around. This manner of fastening is more suitable for Wire and Wrought Iron Work.

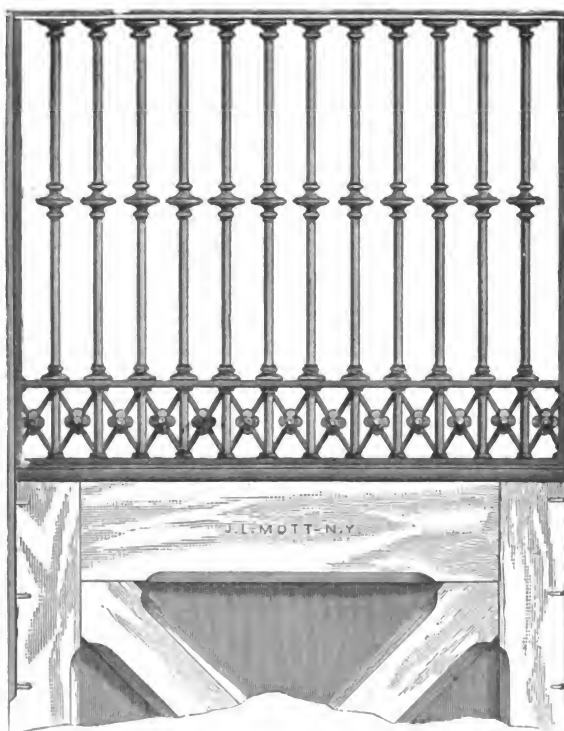

PLATE 205-P.

The above illustrates the manner of fastening Stall Guard, either Cast, Wrought Iron or Wire on top of Door, the width of opening between Stall Posts, see Plate 203-P, with Wrought Iron Straps on either side of Guard which sink flush into Stiles of Door. Cap Rail is also shown under Stall Guard.

Price of Wrought Iron Straps for each Door..... \$2 00

NOTE.—Above Posts can be furnished, with 20 inch Ground Piece, (see Plate 242-P) at an extra cost of \$4.00 each for Plate 239-P, and \$5.00 each for Plates 240-P, 241-P, 243-P and 244-P.

For every additional inch of Ground Piece, to Plates 239-P and 242-P, add 20 cents, and to Plates 240-P, 241-P, 243-P and 244-P, add 25 cents.

Plates 239-P, 240-P, 242-P and 243-P are furnished with projecting flanges 4 feet 6 inches high, to receive 2 inch wood partitions, unless otherwise ordered. Plates 241-P and 244-P have sunken flanges for 2 inch partitions only, and all have flange at Base to bolt to floor when necessary.

Any of the above Posts can be extended to different heights, and are so priced above.

Heads of Posts and extension Pieces can be furnished in Solid Brass, Bronze or Nickle Plated to order, at an additional cost.

Half Posts are furnished at three-quarter price of whole Posts.

MOTT'S NARROW CHANNEL GUTTER FOR LEVEL STALL FLOORS.

PLATE 288-P.

The above Graded Gutter is made with Flange on either side and is $2\frac{1}{2}$ inches wide over all. Commencing flush with the top at one end, it gradually grows deeper through the inclined groove, as shown. By its use the Stall Floor may be laid absolutely level and perfect drainage secured. This supplies a long felt want, and is growing in favor by all who use it. Four or more are used in each Open Stall, and the lower floor is prepared to receive the Gutters with the flanges sunk therein. The upper floor is laid leaving space for the Gutter, as shown in Plate 289-P.

Price, per foot..... 20 cents.

We illustrate in following cuts the application to both Open and Box Stalls.

SECTION OF OPEN STALL WITH CHANNEL CUTTERS.

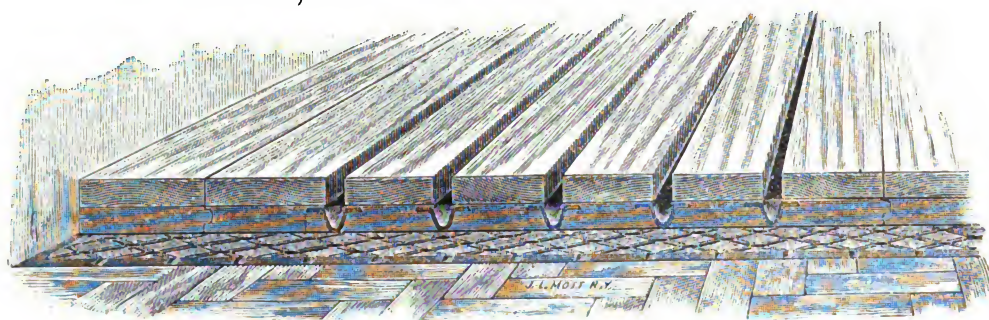

PLATE 289-P.

The above illustrates a section of Open Stall with five Graded Channel Gutters in level floor and draining to the Main or Rear Stall Gutter. Any of our patterns of Gutter and Cover may be used in this connection.

SECTION OF OPEN STALL WITH CHANNEL CUTTERS.

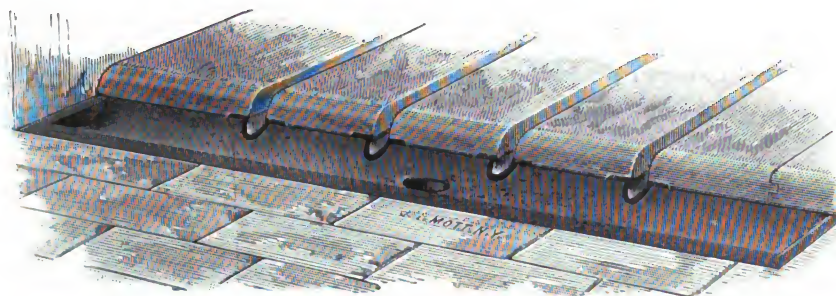

PLATE 290-P.

The above illustrates an Open Gutter $1\frac{1}{2}$ inches deep by 5 inches wide and furnished in 4 feet and 5 feet lengths. It is arranged to receive the Mott's Graded Channel Gutter and have it admitted through the side, as shown. The Graded Channel Gutter is fitted between the flooring planks, see Plate 294-P, and can be laid rapidly with floor. To make a perfectly tight joint when connecting with flange of Rear Gutter, we recommend the use of cement. This method combines perfect drainage with a level Stall floor. Stall floor may then be made nearly level with Stable floor.

The above Cesspool has a Dip of $2\frac{1}{4}$ in. or shallower. See Gratings 335 P, 336-P and 337-P.
No. 2, with $1\frac{1}{4}$ in. Dip.....\$2 50
No. 3, " $\frac{3}{4}$ " 2 50
When furnished without Bell Trap, deduct 10 cents.

PLATE 326-P.

By reference to above Cut the usefulness of this Cesspool is plainly seen. Being made the smallest size ($9\frac{3}{4}$ in. wide x $8\frac{1}{2}$ in. long) possible to accomplish the drainage with either a 3 in. or 4 in. outlet, it can be used, if necessary, with 8 x 5 in. wood Gutters—the side flanges then lapping over to floor edges. The front and back flanges projecting into the bottom of Wood or Concrete Gutters will afford effectual and permanent joining. This Cesspool is furnished with an additional Strainer under the top Grating, and with either both ends open, or one end closed as shown in cuts.

PLATE 329-P.

Section of Plates 328-P and 330-P.

							80

The above Harness Brackets are all modelled to fit the underside of the harness, so as to keep it in shape. The openings in centres will be found very convenient in allowing Martingale and Crupper Straps, attached to either Collar or Saddle to drop through. When full set of Harness is hung, with Rein Brackets (Plate 433-P), as shown on page 149, they form a very neat and economical set of Harness Brackets.

The above, when furnished in Brass, can be Nickel-Plated at an additional cost.

METHOD OF HANGING SINGLE HARNESS OR DOUBLE HARNESS IN SETS, ON MOTT'S

IMPROVED COMBINED COLLAR AND BRIDLE BRACKET.

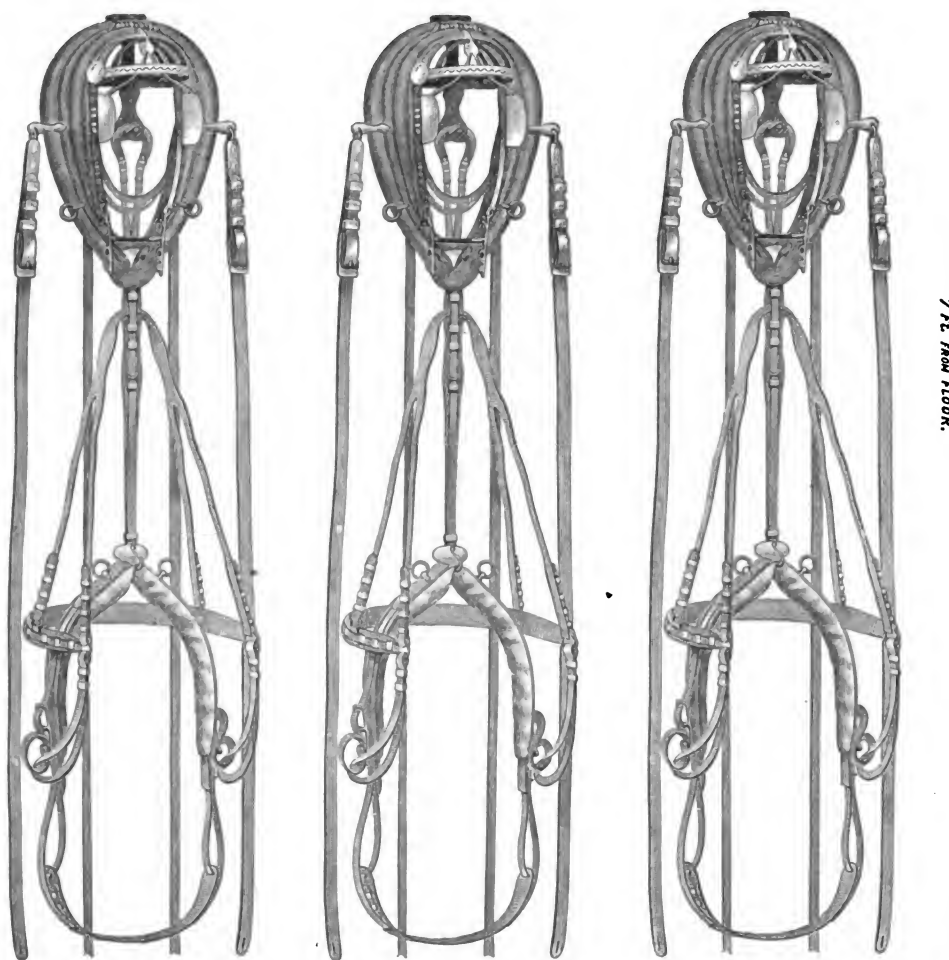

PLATE 392-P.

Showing three Sets of Single Harness.

The above sets of Harness are each hung on one Harness Bracket, Plate 888-P. By reference to cut on page 138 and illustrations above, it can be readily seen how convenient a method this is to hang complete sets of Harness where it is necessary or desirable to economize space in the Harness Case.

The Collar is hung first and then the Bridle. The Crupper on its individual Bracket supports the Saddle, while the Lines are thrown back of the Collar.

	Japanned Iron.	Galvanized Iron.	Polished Brass or Bronze.
Price of each Bracket, Plate 888-P.....	\$1 75	\$2 50	\$10 50
Add if covered with leather.....			\$3 75

The above, when furnished in Brass, can be Nickel-Plated at an additional cost.

METHOD OF HANGING SINGLE OR DOUBLE HARNESS IN SETS, ON MOTT'S IMPROVED HARNESS BRACKETS.

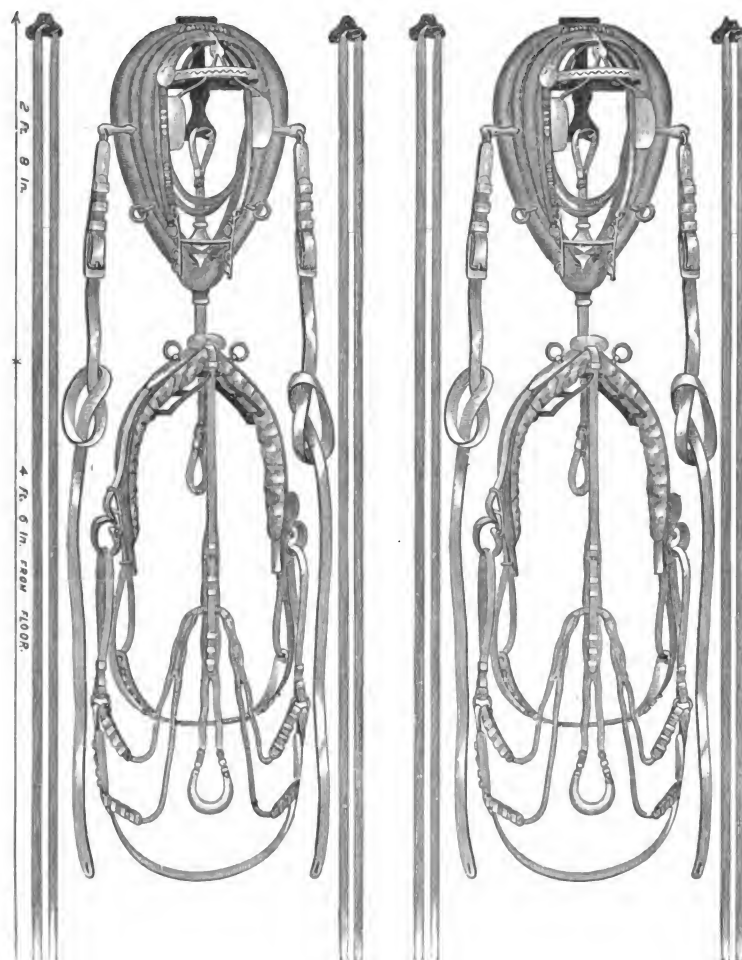

PLATE 393-P.

Showing two Sets of Single or one Set of Double Harness.

The above Harness Brackets are all modelled to fit the under side of the Harness so as to keep it in shape. The openings in centers will be found very convenient in allowing Martingale and Crupper Straps attached to either Collar or Saddle to drop through; and when full set of Harness is hung, with Rein Brackets (Plate 433-P), as shown above, form a very neat and economical set of Harness Brackets.

Price of a Set of Brackets, as above, for Single Harness.

The method of hanging Harness, &c., in sets, is illustrated and priced on pages 142, 143, 144 and 145.

We furnish to order wood cappings to correspond with the wood finish of stable. We furnish above Iron Frames, finished in colors, scarlet or blue to order at a slight advance on above prices. These are the most improved Harness and Saddle Brackets now made. In addition to their handsome appearance, they combine the strength of iron with the advantages of wood or rubber, and soon save their cost by the preservation of the Harness, &c.

METHOD OF HANGING SINGLE HARNESS, IN SETS, ON ENGLISH VENTILATING BRACKETS,
WITH POLISHED WOOD OR SOLID RUBBER CAPPINGS.

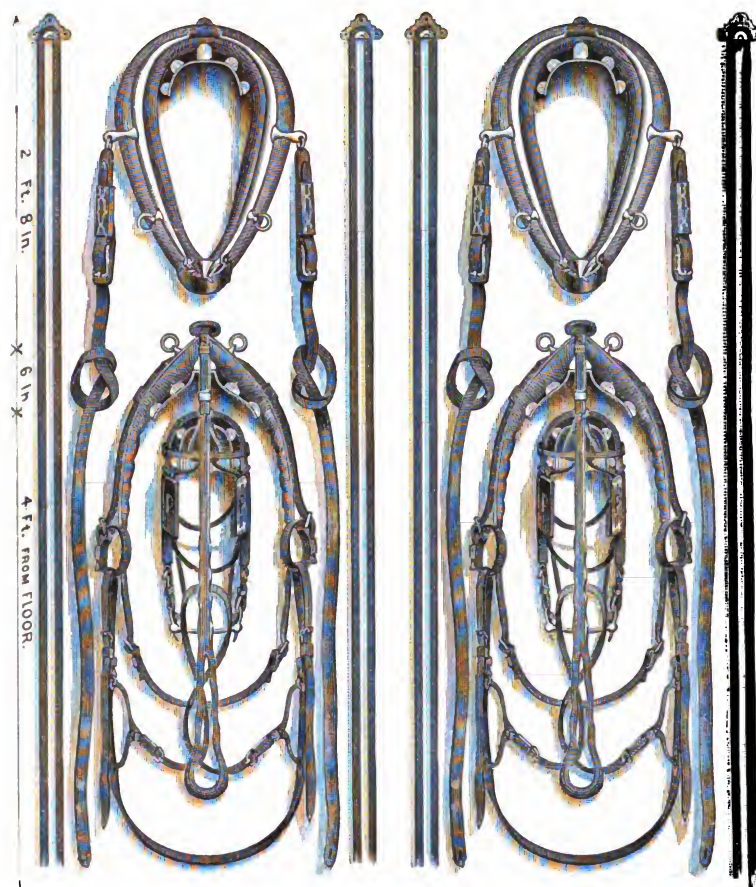

PLATE 1403-P.

Showing Two Sets of Single Harness.

The English Ventilating Harness Brackets are made of Japanned Iron, Polished Brass or Bronze Frames, with *Cappings of Polished Wood or Solid Rubber*. They are all modelled to fit the under side of the harness, so as to keep it in shape. There are openings in the frame work to admit air to dry the padding; they are highly finished with neatly rounded surfaces and are acknowledged to be the most perfect form of Brackets yet made for the thorough preservation of the Harness. The Polished Wood or Solid Rubber Cappings cannot be too strongly recommended, as it is impossible for any part of the Harness to become injured by rust.

Price of a Set of Brackets, as above, for Single Harness.

One Harness Saddle Bracket, Plate 398-P.	} Per Set, with Mahogany Cappings.....	Japanned Iron.	Pol'd Brass or Bronze.

WROUGHT IRON CEILING TRACK, WITH BRACKETS.

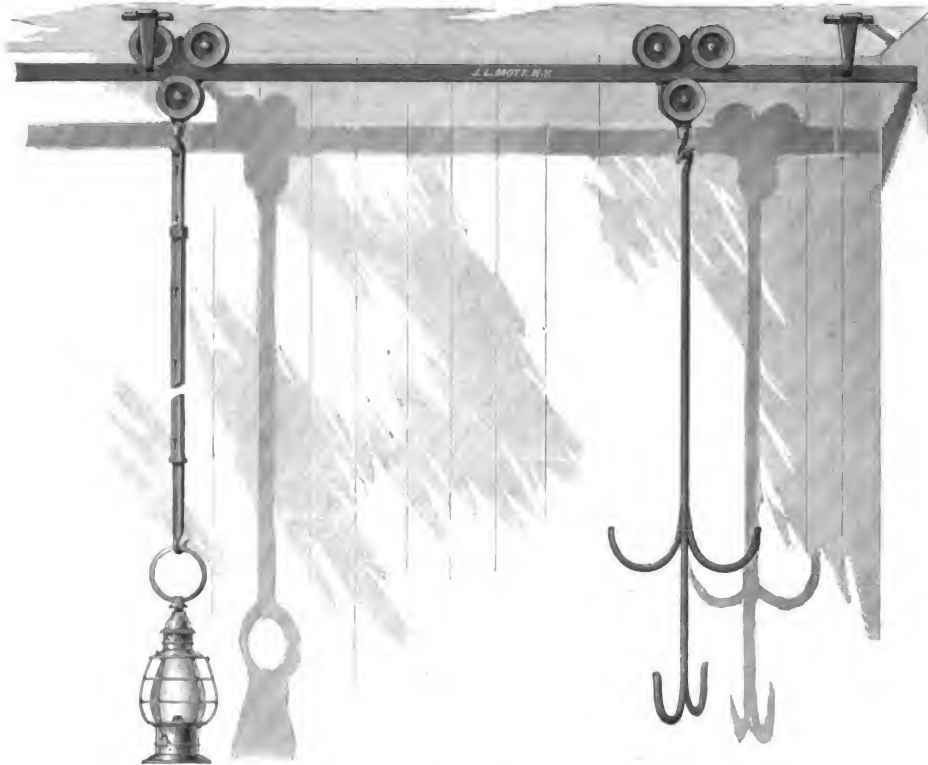

PLATE 557-P.

Track made any length, to order. Designed for the convenience of securing a Lantern back of a range of stalls, where it can be suspended from ceiling by a Carriage that runs on the Track with perfect safety, and at the same time allows attendant to bring the light directly behind each Horse, or wherever it may be required. By an ingenious contrivance, the Lantern can be raised or lowered at pleasure.

Also designed for the convenience of suspending one or more Oiling and Washing Brackets, in a similar manner. When the latter is ordered as shown, the height of Ceiling should accompany order.

When in use in the Harness Room, the advantage of the suspending and moveable Oiling and Washing Brackets over the stationary Brackets, will be fully appreciated by those using them.

Price, Suspending and Adjustable Lantern Bracket, arranged to raise or lower the light, complete with Carriage, without the Lantern.....	\$ 7 50

Price \$6 00

WROUGHT IRON SWINGING CRANE.

PATENT SELF-ACTING OAT CLEANER.

This will remove a bushel of Dust, Dirt and Impurities from every twenty-five to thirty bushels of the best White Oats, and is the most perfect Grain Purifier known. Cannot get out of order, and will last for years.

Saves sickness among horses—money, time and trouble.

A series of screens arranged in a zigzag channel extend from the top to the discharge spout below. Open spaces conduct all dust and dirt thrown off the screens and separator to the bottom. The coarser particles are carried off by the separator at top when the grain is first received from the Bin, then dashing from screen in its descent, it passes out thoroughly cleansed.

If the Oat Bin is on the floor above, connection is made with the top of the cleaner, otherwise it may be provided with a large Hopper, which, when filled can be drawn from as needed.

Cleaner can be readily put up as soon as received.

	Poplar with Japanned Trimnings.	Hardwood with Bronzed Trimnings.

OVERHEAD HITCHING ATTACHMENT.
FOR DOUBLE OR SINGLE TEAM. PATENT APPLIED FOR.

PLATE 608-P.

The above set of Pulleys are constructed for the special purpose for which they are designed. Very convenient for use in Carriage Room, where it can be quickly connected; and in Stable when grooming Horses. Recommended for vicious Horses.

	Jap'd Iron.	Brass.
Price, comp. with Rope, Pulleys, Cleat and Snap	\$2 50	\$6 00

INSTANTANEOUS RELEASING BOLT FOR HITCHING.

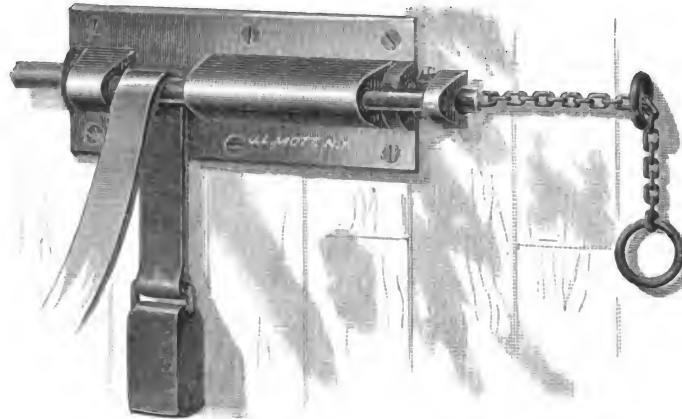

PLATE 609-P.

Japanned. Galvanized.

Price, each Bolt, without Leather Strap.....	\$2 50	\$3 25
“ Leather Strap, Snap and Iron Weight	\$2 75	

The advantages of the above cannot be too highly estimated. In large Stables having long lines of continuous Stalls every horse can be instantly released in the event of fire. A lever or Chain and Pull, in passage outside of Stalls, attached to a Rod running through an entire range of Stalls, and connected with each Bolt by means of an adjustable fixed nut (as shown in right of Cut) will, with a vigorous pull withdraw each Bolt, thus releasing Halter Straps and giving freedom to the Horses. A spring in the barrel carries each Bolt back, as soon as pressure is released. This arrangement will not however interfere with the independent releasing of any one Horse at a time. Price of Rods, Levers, etc., on application.

Each Stall will accommodate Two Cows.

COW HOUSE INTERIORS.

PLATE 743-P.

In above illustration is shown two lines of stalls with feeding passage in centre. The Posts are of Cast Iron, (see Plate 751-P.) and should be set about 3 feet 6 inches apart. From the front edge of the Feeding Trough to the Gutter there should be at least 4 feet 6 inches of floor. The Cast Iron Feeding Trough shown is our Plate 727-P and Cast Iron Gutter, our Plate 745-P. The partition should be of two inch wood running back not less than 2 feet 6 inches, while the Cap and Bottom Rails for partitions are illustrated and priced in Plates 207-P and 214-P. The Tying Chain in Plate 750-P will be found most convenient.

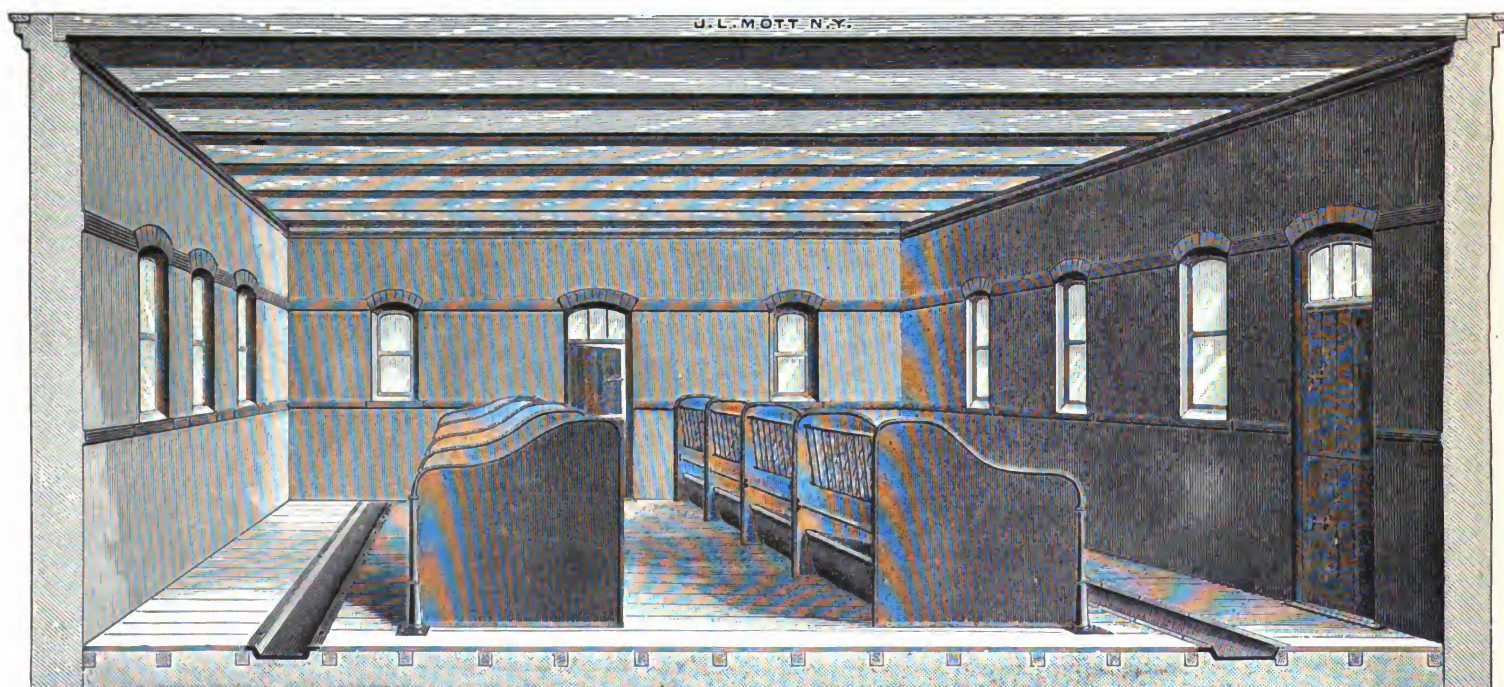

PLATE 744-P.

The Fittings in above illustration are those described and priced in Plate 741-P.

The passage in centre offers a convenient method of feeding. The Gutters should be placed about 4 feet 6 inches from the front edge of the Feeding Trough, and are illustrated and priced in our Plate 745-P.

The Manger shown is our Plate 752-P and is 6 feet 11 inches long x 20 inches broad at top.

Each Stall will accommodate Two Cows.

CAST IRON GUTTER FOR CATTLE STALLS.

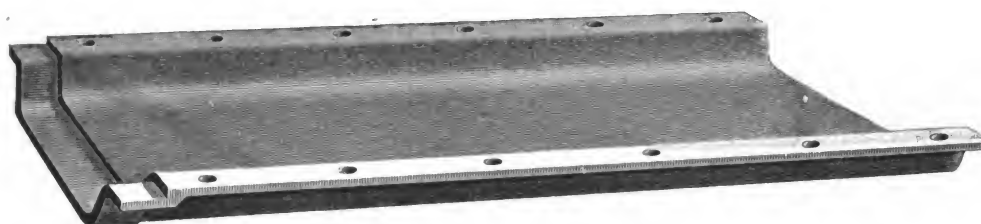

PLATE 745-P.

With Flanges to screw to wood floor. 14 inches wide inside.

Price per foot Plain. \$1 75

CAST IRON GUTTER WITH CAST IRON GRATING.

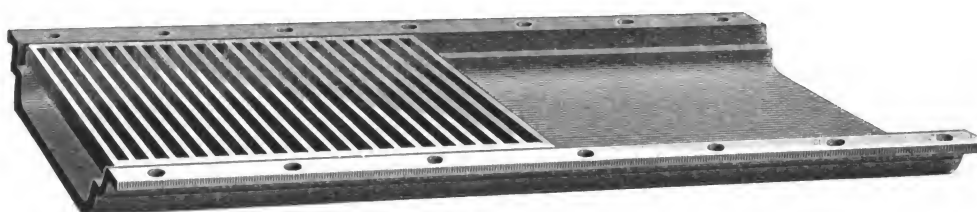

PLATE 746-P.

With Flanges to screw to wood floor. 14 inches wide inside.

Price of Gutter and Grating per foot. Plain. \$4 00

The Grating is made in short lengths, (2 feet 6 inches long) for convenience of handling.

PLANS OF CATTLE HOUSE INTERIOR.

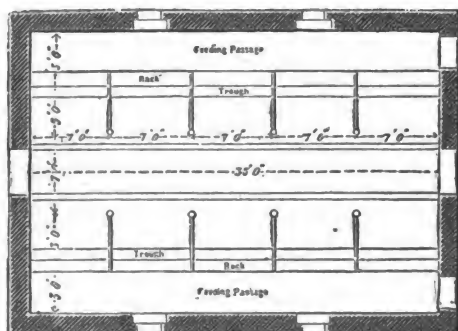

PLATE 747-P.

Showing ten stalls with Central and Side Passages.

The Side Passages are used for feeding.

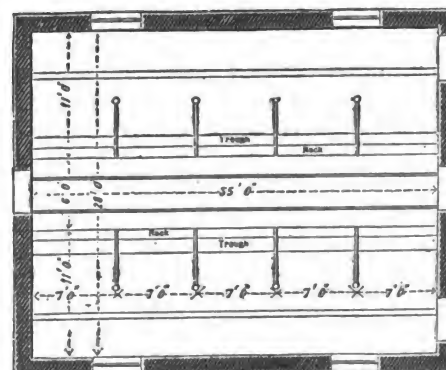

PLATE 748-P.

Showing ten stalls with Central and Side Passages.

The Central Passage may be provided with Rails for Feeding Wagon, as shown in Plate 195-P.

WARRINER'S CATTLE STANCHION.

PATENTED SEPTEMBER 12TH, 1882.

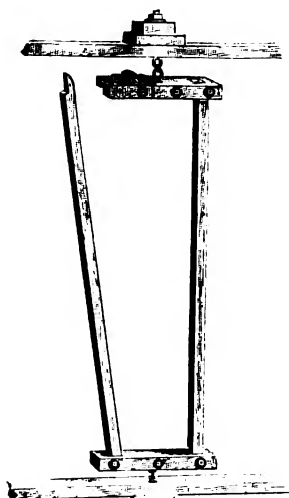

PLATE 749-P.

These fasteners are made of seasoned hard wood well bolted together, and are perfectly safe and durable. The chain at either end allows a motion which is free and easy in all directions including a rotary one.

They are 3 ft. $7\frac{1}{4}$ in. high x $6\frac{3}{4}$ in. wide inside.

Price, each.....\$1 50

The following Stall dimensions are suited to the ordinary size cow.

Give each cow a space at least 3 feet wide on a floor 4 feet 6 inches long from the front edge of Feeding Trough to Gutter.

TYING CHAIN.
